### PURPOSE & INTENT OF THE PROCESS

A conditional use is a land use which, because of its unique characteristics or potential impact, may not be compatible or may be compatible only if certain conditions are required that mitigate or eliminate the negative impacts. Those land uses are listed with a "C" in Land Use Tables of each zoning district, according to [21A.33](#).

According to state and city code, conditional uses are allowed uses unless appropriate conditions cannot be applied to mitigate adverse impacts. Approval of a conditional use requires review of its location, design, configuration, and impact to determine the desirability of allowing it on a site. Whether the use is appropriate requires weighing of public need and benefit against the local impact, taking into account the applicant's proposals to mitigate adverse impacts through site planning, development techniques, and public improvements.
