PURPOSE & INTENT OF THE PROCESS

The designation of a Character Conservation District recognizes an area with a distinct physical character and creates specific design standards for development to apply within the boundaries of such district. The intent of the process is to protect neighborhood character and ensure development is compatible and in character with the area.

Specific purposes of character conservation districts for residential neighborhoods and commercial districts are as follows:

1. To protect and strengthen desirable and unique physical features, design characteristics, and recognized identity and charm.
2. To promote and provide for economic revitalization.
3. To protect and enhance the livability of the city.
4. To reduce conflict and prevent blighting caused by incompatible and insensitive development and to promote new compatible development.
5. To stabilize property values.
6. To provide residents and property owners with a planning tool for future development.
7. To promote and retain affordable housing.
8. To encourage and strengthen civic pride.

Character Conservation Districts are different from Local Historic districts. While both districts are created to preserve a community's physical attributes, a character conservation district does not focus on historic fabric and may include development controls as well as design review.

CHARACTER CONSERVATION DISTRICT STANDARDS ([21A.35.080](#))

A decision to create a character conservation district is a matter committed to the legislative discretion of the city council and is not controlled by any one standard.

- A.** In making its decision concerning creation of a character conservation district, the city council should consider the following factors:
1. The proposed character conservation district is an established area with shared distinguishing characteristics, which may include architecture, geography, development, services, and interests.
 2. The proposed character conservation district is a logical neighborhood unit with a closely settled development pattern on similar sized parcels.
