

Motion Sheet for PLNHLC2018-00616

Motion to approve:

Based on the information in the staff report, the information presented, and the input received during the public hearing, I move that the Historic Landmark Commission approve the requested new construction/major alteration, PLNHLC2018-00616 with the following condition:

1. Final details of the requested changes be delegated to staff.

Motion to approve with conditions modified by the Commission:

Based on the information in the staff report, the information presented, and the input received during the public hearing, I move that the Historic Landmark Commission approve PLNHLC2018-00616 with the conditions listed in the staff report.

1. List any additional conditions.

Motion to deny:

Based on the information in the staff report, the information presented, and the input received during the public hearing, I move that the Historic Landmark Commission deny PLNHLC2018-00616 because evidence has not been presented that demonstrates the proposal complies with the following standards:

1. (the commission should make findings related to which standards are not complied with)

G. Standards For Certificate Of Appropriateness For Alteration Of A Landmark Site Or Contributing Structure Including New Construction Of An Accessory Structure: In considering an application for a certificate of appropriateness for alteration of a landmark site or contributing structure, the Historic Landmark Commission, or the Planning Director, for administrative decisions, shall find that the project substantially complies with all of the following general standards that pertain to the application and that the decision is in the best interest of the City:

1. A property shall be used for its historic purpose or be used for a purpose that requires minimal change to the defining characteristics of the building and its site and environment;

2. The historic character of a property shall be retained and preserved. The removal of historic materials or alteration of features and spaces that characterize a property shall be avoided;

3. All sites, structures and objects shall be recognized as products of their own time. Alterations that have no historical basis and which seek to create a false sense of history or architecture are not allowed;

4. Alterations or additions that have acquired historic significance in their own right shall be retained and preserved;

5. Distinctive features, finishes and construction techniques or examples of craftsmanship that characterize a historic property shall be preserved;

6. Deteriorated architectural features shall be repaired rather than replaced wherever feasible. In the event replacement is necessary, the new material should match the material being replaced in composition, design, texture and other visual qualities. Repair or replacement of missing architectural features should be based on accurate duplications of features, substantiated by historic, physical or

pictorial evidence rather than on conjectural designs or the availability of different architectural elements from other structures or objects;

7. Chemical or physical treatments, such as sandblasting, that cause damage to historic materials shall not be used. The surface cleaning of structures, if appropriate, shall be undertaken using the gentlest means possible;

8. Contemporary design for alterations and additions to existing properties shall not be discouraged when such alterations and additions do not destroy significant cultural, historical, architectural or archaeological material, and such design is compatible with the size, scale, color, material and character of the property, neighborhood or environment;

9. Additions or alterations to structures and objects shall be done in such a manner that if such additions or alterations were to be removed in the future, the essential form and integrity of the structure would be unimpaired. The new work shall be differentiated from the old and shall be compatible in massing, size, scale and architectural features to protect the historic integrity of the property and its environment;

10. Certain building materials are prohibited including the following:

a. Aluminum, asbestos, or vinyl cladding when applied directly to an original or historic material.

11. Any new sign and any change in the appearance of any existing sign located on a landmark site or within the H Historic Preservation Overlay District, which is visible from any public way or open space shall be consistent with the historic character of the landmark site or H Historic Preservation Overlay District and shall comply with the standards outlined in [chapter 21A.46](#) of this title.
