RE: Petition 410-08-44 Saxton Grove Planned Development located at approximately
321 and 365 South 870 West

On October 22, 2008 the Planning Commission approved our 13 unit planned development and gave, Intermountain Home Solutions, the applicant, permission to submit plans for construction to the Permits Office for a building permit.

Due to economic reasons tied to both the real estate market and lending environment we are asking that the Planning Commission grant a 12 month extension for our approvals to submit plans for construction for a building permit.

Thank you,

Greg Cleverly
