6. **PLNPCM2010-00468 Parking and Transportation Demand Management** - A public hearing proposed amendments to the Salt Lake City Zoning Ordinance to incorporate transportation demand management strategies into the city's off-street parking regulations, found in Chapter 21A.44 of the Zoning Ordinance. As part of this proposed text amendment, related sections of Title 21A would also be amended. Transportation demand management (TDM) is a system of regulations and policies that are designed to influence residents’ and employees’ travel decisions for the purpose of decreasing vehicle miles traveled, reducing traffic volume during peak periods, and varying travel modes. Effective TDM strategies thus reduce pollution, congestion and infrastructure costs while improving public health and promoting sustainable development. Developments that incorporate TDM strategies in their plans would be able to reduce their parking. Examples include transit passes, carpooling and bicycle lockers.
