

# **MEMORANDUM**

PLANNING DIVISION COMMUNITY & ECONOMIC DEVELOPMENT

To: Salt Lake City Planning Commission

From: Daniel Echeverria, Principal Planner

801-535-7165 or daniel.echeverria@slcgov.com

Date: July 22, 2016

Re: TSA Zoning District Improvement Update

**ACTION REQUIRED:** No action is required. Planning staff would like the Planning Commission's input on the direction staff is taking the general Transit Station Area zoning changes. A

summary of the changes being considered is attached.

**BACKGROUND/DISCUSSION:** In April of this year, Planning staff provided an overview to the Planning Commission of the Transit Station Area (TSA) zoning district and the issues that had been identified with the regulations. Following that meeting on June 20th, the City Council initiated a petition to review the TSA zoning district regulations and identify changes that would resolve the issues with those regulations. In addition to the variety of issues identified in the Planning staff memo from April, the Council asked that staff consider the following objectives during the review process:

- Require that uses on the ground floor of a building encourage engagement with pedestrian on the street as well as building occupants including but not limited to, establishment of retail and commercial uses.
- Consider maximum allowable percentages of non-durable materials on building facades.
- Adjust the development score to further incentivize affordable housing.

Since that time, staff has identified a number of potential changes to the zoning district to address these issues and objectives. A summary of the potential changes are located on the following page. The specific zoning code and design guideline language to accommodate these changes has not been fully developed. The language will be developed following the Planning Commission meeting and will be brought to the Planning Commission at a follow-up meeting in August.

The Planning Division will also be hosting an open house on July 28th. The intent of this open house is to obtain feedback from the community and developers regarding the potential changes discussed in the attachment to this memo.

A summary of the proposed changes follows on the next page.

# **TSA Zoning District Summary of Proposed Changes**

July 20, 2016

Below is a list of changes to the TSA zoning district that are being considered by the Planning Division. This list and the details are subject to change due to internal review, public input, and review by the Planning Commission.

# **Changes to Zoning Code (Ordinance)**

| 1   | Noticing   |  |
|---|--|--|
|   | The primary issue is that neighbors do not receive any notification that a new building may be being |  |
| built next door. This issue is not unique to the TSA zoning district and is similar to what would |  |  |
|   | trict where the only approval or permit required is a  |  |
| building permit.  | aree miere are only approval of permit required to a   |  |
| Current Regulation  | Proposed Regulation  |  |
| No noticing requirement unless the project is   | Administrative (Staff) Approval Eligible Projects:   |  |
| required to be reviewed by the Planning   | Courtesy notice to properties within a certain   |  |
| Commission.   | distance and recognized organizations stating  |  |
|   | that a new development has been proposed.  |  |
|   | Courtesy notice issued at same time of   |  |
|   | development score approval.  |  |
|   | The notice is an FYI and identifies where people   |  |
|   | can learn more. It will also explain the approval  |  |
|   | process.   |  |
|   | Planning Commission Eligible Projects:   |  |
|   | Normal public hearing noticing requirements,   |  |
|   | which is a notice sent to all property owners and  |  |
|   | tenants within 300 feet, the property is posted  |  |
|   | with a sign, and notice sent to recognized   |  |
|   | organizations.   |  |
| Table of  | Prohibited Uses  |  |
|   | reates confusion for the community, property owners,   |  |
| developers, and the lending community. The ta   | able may be producing unnecessary amount of work to  |  |
| administer the ordinance because of the confu   |  |  |
| permitted and conditional uses, which is similar  | ar to all other zoning districts in the City.  |  |
| Current Regulation  | Proposed Regulation  |  |
| Table of prohibited uses lists those uses that  | Adds a table of permitted and conditional uses to the  |  |
| are not allowed.  | land use table chapter. In most instances, the uses  |  |
|   | that were prohibited will not be permitted. Some   |  |
|   | uses that were prohibited will now be listed as  |  |
|   | permitted or conditional.  |  |
|   |  |  |
| Setbacks  |  |  |
| Front setback requirement is problematic along 400 South and is not producing usable space in the |  |  |
| setback or providing street engagement for nonresidential uses.                                   |  |  |
| Current Regulation  | Proposed Regulation  |  |
| Current min. setback along 400 South: 15'   | • Reduce the minimum from <b>15'</b> to a lower  |  |
|   | number, such as 5'. Still require 10' sidewalk   |  |
|   | installation where sidewalk is currently <10'.   |  |
|   | This could apply to a certain % of the street  |  |
|   | facing façade or be based on use (ex: ground floor   |  |

|  | residential could have more setback to create some semi-private front yards.)  |  |
|--|--|--|
| <ul> <li>Front yards are only required to be landscaped as indicated in the landscaping chapter.</li> <li>A minimum of 33% of the area must include live plant materials.</li> </ul>   | Require a certain % of the yard to be usable space, such as front porches, patios, or other similar space.   |  |
| Parkin The ordinance contains conflicting regulations  | g Lot Location<br>regarding parking lots as a standalone use.  |  |
| Current Regulation   | Proposed Regulation  |  |
| Surface parking lots are permitted as the principal use on a parcel of land  | Delete this provision. Surface parking lots would still<br>be allowed, but would not be allowed to be the only<br>use on the property.   |  |
|  | lding Scale  |  |
| character of the street and the function of the s  | large buildings are having a negative impact on the streets as walkable areas. There are a number of cluding the height, setbacks, length of building wall,  |  |
| Current Regulation   | Proposed Regulation  |  |
| Building entrance required on average of every <b>75 feet.</b>   | <ul> <li>Building entrance required for a minimum of every 50 feet on average.</li> <li>Ground floor residential uses are required to have a primary entrance facing the street.</li> </ul>  |  |
| Length of building wall uninterrupted by glass, doors, change in building wall plane, or similar design feature required every <b>30 feet.</b>   | Reduce the length of building wall uninterrupted by windows, doors, change in building wall plane to 15 feet.  |  |
| Length of building wall adjacent to a street is not limited.   | Limit the length of buildings walls adjacent to a street to <b>200 feet.</b>   |  |
| Ground Floor Uses Similar to the issue of scale, the ground floor of buildings are not including uses that help activate the street, put eyes on the street, or provide commercial spaces to help maintain the need to provide spaces for commerce and economic development. |  |  |
| Current Regulation   | Proposed Regulation  |  |
| Prohibits ground floor parking from being visible from the street, but does not require any specific uses.   | <ul> <li>Require active ground floor use for a minimum of 75% of street frontage, reducible to 50% with Planning Commission approval.</li> <li>Use is required to extend a minimum of 25 feet into building.</li> <li>~25 feet would be exempt from this provision to accommodate vehicle access.</li> </ul> |  |
| Building entrances required on average of every <b>75 feet.</b>  | <ul> <li>Building entrance required for every 50 feet.</li> <li>Ground floor residential uses are required to have a primary entrance facing the street.</li> </ul>  |  |
| No requirements for nonresidential or commercial uses on ground floors of major streets  | Add a requirement for nonresidential/commercial uses on ground floors of projects facing 400 South and North Temple.   |  |

# **Inner-Block Walkways**

Large footprint buildings and lack of side yard setback requirements makes it unlikely for midblock walkways to ever be constructed. The large blocks of the City create longer walking distances and reduce route options. This type of infrastructure is necessary to increase the number of people who are willing to walk between where they live and/or work or other destinations

| G - D 1                                |  |
|--|--|
| <b>Current Regulation</b>              | Proposed Regulation  |
| No requirement for a midblock walkway. | <ul> <li>Require midblock walkways when they are identified in an adopted master plan of the City.</li> <li>Require a midblock walkway when a property is more than 200 feet from intersecting streets.</li> <li>Minimum width of walkway is 10 feet, with a minimum paved path width of 10 feet.</li> <li>If streets and midblock walkways already exist, new midblock walkways would not be required.</li> </ul> |
|  | , TA A T   |

#### **Building Materials**

There are two primary issues with the existing building material regulations. The first is that the allowed materials list is very limited. Architects have expressed a desire to allow more materials. The second issue is that there are no building material requirements for upper floors. Related to this issue is the use of exterior insulated finishing systems (EIFS), which is sometimes referred to as "synthetic stucco."

| synthetic staces.  |  |
|--|--|
| Current Regulation   | Proposed Regulation  |
| Specific high-quality ground floor building materials required for <b>80</b> % of street facing facades. Allowed materials include brick, masonry, textured or patterned concrete, and/or cut stone. | <ul> <li>Keep minimum material requirement at 80%. Expand allowed materials to include fiber cement products and metal.</li> <li>Other materials may be allowed if they are durable, long lasting materials and approved by the Zoning Administrator.</li> </ul> |
| No building material requirements for upper floors.  | • Require at least <b>50</b> % of upper floor materials to be composed of the same high-quality materials allowed for ground floors.   |
| No restriction on EIFS (Exterior Insulation and Finishing System)  | • Limit EIFS to a max of <b>10%</b> of all street facing façades.  |

# **Parking Structure Design Standards**

Parking structures have the potential to have a large visible impact to the street and adjacent properties.

| Current Regulation  | Proposed Regulation   |
|---|---|
| Ground floor of parking structures required to have an active use.                    | Must be wrapped with a building material that adds interest and screens vehicles. |
| • Levels of parking above the first floor that are visible from a street are required | • Parking levels must be level. All ramps must be internal to the structure.      |
| <ul><li>to be level, not sloped.</li><li>Vehicles shall be screened.</li></ul>        | Elevators and stairs need to be externally highlighted.                           |
| • Underground parking may extend up to 5 feet above grade if they are screened by     | Signage and wayfinding incorporated into the building.                            |
| vegetation or wrapped in ground floor building materials.                             | • Interior lighting shall not create a nuisance outside the structure.            |
|   | Driveways must be different than sidewalk materials.                              |
|   | Habitable space required along the street level.                                  |

|   | Venting and mechanical equipment must be screened and not located near the sidewalk. |
|---|--|
|   | <ul> <li>Street facing building materials and use</li> </ul>                         |
|   | requirements apply to parking structures.  |
| Minor changes to make   | e it easier to use the ordinance   |
| Minor changes include small changes that clarify existing regulations. These types of issues are      |  |
| identified as the Planning Division and Building Services reviews projects and identifies sections of |  |
| the code that need create confusion or require some sort of interpretation of the code.               |  |
| Current Regulation  | Proposed Regulation  |
| Additional building height provisions allow   | Require that the slope be visible from the street and                                |
| for an extra story of building height for   | cannot be hidden behind a parapet wall.  |
| sloped roofs.   |  |
| The current setback requirements are listed   | List setbacks in a chart so it is easier to use and                                  |
| in a bulleted format that makes it difficult to   | administer the setbacks.   |
|   |  |

# **Changes to Guidelines**

The following table summarizes the proposed changes to the development guidelines in the TSA zoning district. The development guidelines are used to determine the approval process for new projects. Each guideline includes a point value that is based on a combination of the cost of including the guideline in the project, the level of importance of the guideline in relation to accomplishing City goals, and level of desirability to the community in general. The proposed changes are in response to the number of projects that have been reviewed under the TSA process, issues identified with the existing guidelines and a changing emphasis on citywide goals.

| ixed use development. A mixed use development   |
|---|
| per floors and businesses on the ground floor.  |
| Proposed Guideline  |
| Based on % of floor area of street facing habitable space only, not entire ground floor area.  Ordinance change will require this space to be a minimum depth of <b>25 feet.</b> • If 100% of area is nonresidential use: 20 points  • 75-99% of area is nonresidential use: 15 points  • 50-74% of area is nonresidential use: 10 points |

# **Building Materials**

This guideline incentivizes the use of higher quality building materials on street facing facades than what is required by the TSA zoning district. The TSA zoning district currently requires 80% of street facing, ground floors to be covered in high quality, durable building materials. A new standard is being added that requires 50% of street facing, upper floors to use high quality building materials. On a 6 story building, this could result in approximately 54% of an overall façade using high quality, durable building materials. This guideline awards points if the project exceeds the minimum requirements of the zoning ordinance.

|--|---|--|
| Current Guideline  | Proposed Guideline  |  |
| <ul> <li>Limited materials that qualified</li> <li>Low % of total street facing façade</li> </ul>  | <ul> <li>15 points are available if more than 75% of the overall street facing façade is clad in durable materials.</li> <li>10 points are available if more than 65% of the overall street facing is clad in durable materials.</li> </ul> |  |
| Roo  | ftop Design   |  |
| This guideline is intended to add variety to the roof shapes of buildings and add interest to the skyline.   |   |  |
| Current Guideline  | Proposed Guideline  |  |
| Awards points for roof top designs that include sloping roofs and other rooftop design features.   | Clarify that a sloping roof has to be visible from a public street to qualify and cannot be hidden behind a parapet wall.   |  |
| Eyes on the Street Windows, doors, and outdoor space on buildings tend to make public spaces safer and more inviting. This guideline is intended to incentivize building features that accomplish this.  |   |  |
| Current Guideline  | Proposed Guideline  |  |
| The guideline lists but does not provide any dimensional requirements to qualify.  | Add a minimum dimension for usable balconies and increase the total points from <b>10 to 15</b> .   |  |
|  | ublic Art   |  |
|  | amount of art in the city that is visible to the public.  |  |
| Current Guideline  | Proposed Guideline  |  |
| The current guideline provides points based on the % of a project budget that is allocated for public art. This guideline has not been used and often times total project budget is difficult to determine until construction drawings are complete. | <ul> <li>Allow points based on the number of public art pieces provided.</li> <li>Public art has to be visible from a public space.</li> <li>A maximum of 6 points are available.</li> </ul>  |  |
| Bicycle Amenities  |   |  |
|  | cle infrastructure in buildings to encourage cycling in the City.   |  |

Provides points for providing a bike rack. • Remove poin

 The zoning ordinance has been changed since this guideline was created and now requires bike racks.

**Current Guideline** 

• Remove points for bike racks (required by ordinance)

**Proposed Guideline** 

Add **30 points** for a green bike station.

# Midblock Walkways

The purpose of this guideline is to encourage the creation of walkways, alleys, and small streets that break up the large city blocks and encourage more walking, biking, and alternative routes for vehicles.

|   | vehicles.  |   |
|---|--|---|
|   | Current Guideline  | Proposed Guideline  |
| • | The current guideline is worth a limited number of points that do not incentivize providing a midblock walkway.  The guideline does not indicate what the minimum width for a walkway should be. | <ul> <li>Add minimum widths and increase the points.</li> <li>30 points would be available if a narrow alley or street is provided.</li> <li>20 points if it is a walkway that is a minimum of 10 feet in width.</li> <li>Changes to the TSA zoning district are going to require midblock walkways where the walkway is indicated in an adopted master plan or for developments that are more than 200 feet from an intersection.</li> </ul> |
| , | Parking  The parking guideline was initially created to encourage structure parking versus surface parking   |   |
|   | The narking guideline was initially created to   | Ancourage etructure parking versus surtace parking  |

The parking guideline was initially created to encourage structure parking versus surface parking. The guideline also included basic design guidelines to address the overall design of the structure.

#### **Current Guideline**

Points are based on the % of total parking that is located in a parking structure or below grade.

- 100% of the parking is structured: 50 points
- 75% of the parking is structured: 40 points
- 50% of the parking is structured: 25 points.

# **Proposed Guideline**

- Changed to parking structure design and % of parking structure wrapped by habitable space or that is wrapped in building materials similar to habitable portion of building.
- The total available points are limited to 25.

Ordinance changes add design requirements for parking structures. This guideline will be above and beyond what is required by ordinance, but may not be necessary depending on the outcome of the proposed ordinance changes.

### **Alternative Parking**

This guideline was meant to incentivize projects that provided parking for electric vehicles, scooters, and other alternative vehicles.

| Current Guideline  | Proposed Guideline  |
|--|---|
| Points are available for providing any type of EV stations.  Since this guideline was adopted, the City started requiring all new projects to provide EV stations. The City Council is considering making changes so that an actual station is not required, but new buildings will be required to have the conduit and electrical capacity to provide stations. | <ul> <li>Points provided based on type of EV charging stations.</li> <li>EV stations with the capability of charging vehicles faster receive more points.</li> <li>These changes are in response to the changes in City ordinance.</li> </ul> |

| Parking Ratio  This is a new guideline that is being proposed. This guideline is an alternative approach to incentivizing projects that provide less parking than what the market is currently providing in transit areas. |   |
|--|---|
| Current Guideline  | Proposed Guideline  |
| This is a new guideline being added.   | <ul> <li>Points based on the parking ratio of the project.</li> <li>Residential components of a project receive 25 points if the parking provided is less than 1 stall per unit and 15 points if the ratio is between 1.25 stalls per unit and 1 stall per unit.</li> <li>Non residential projects receive 25 points if the parking ratio is 2 or less stalls for every 1,000 square feet.</li> </ul> |

# **Changes to the Approval Process**

The Planning Division is currently reviewing the point system based on the changes to the guidelines, outcomes of completed projects and identified issues with the current process. The current process creates a three tiered approval process:

**o-49 points**: Projects are required to be approved by the Planning Commission through the Conditional Building and Site Design (CBSD) review process.

**50-99 points:** Projects are required to be approved at an administrative public hearing that uses the CBSD review standards to determine if a project should be approved.

**100+ points**: Projects are approved "administratively" at the staff level.

The proposed changes to the approval process include the following changes:

- Exempting single family, two family and three family dwellings from the approval process. These types of projects would not be subject to the development guidelines, but would be required to comply with all zoning regulations.
- Changing from a three tiered process to a two tiered process. The middle tier would be eliminated and projects would either be approved by the Planning Commission after a public hearing or at the staff level.
- Increasing the threshold for administrative approvals. A number of past projects are being reevaluated based on the proposed changes to the guidelines outlined above. If the results of that evaluation indicate a change in threshold is warranted, a change will be proposed that is based on how the outcome of past projects may have changed and a change in citywide development goals. There are a number of options:
  - o Leave the administrative approval threshold at 100.
  - Increase the administrative approval threshold based on the results of the re-evaluation.
     The threshold should be set at a level that can be justified, such as a certain % above the median or mean score.

As of July 7, 2016, a total of 8 completed projects have been re-evaluated using draft alternative guideline scoring. The results are in the below table. The median value of the projects in the table is 100. The mean score is 119, but is heavily influenced by the Eco-Lofts project, which is the highest scoring project in the TSA scoring district. These numbers will be adjusted as other projects are re-evaluated.

| Project  | Old<br>Score | New<br>Score | Primary Reasons for change in score   |
|--|--------------|--------------|---|
| Encore<br>455 East 400 South                       | 151          | 84           | Architecture: -15 Building materials -10 Emphasis on corner building -10 Structured parking: -50 Parking ratio: +15 |
