PALMER DEPAULIS

SAVI' LAKE: GHIY CORPORATION

OFFICE OF THE MAYOR 300 CITY AND COUNTY BUILDING SALT LAKE CITY, UTAH 84111 535-7704

Dear Citizens of Salt Lake City:

On August 7, 1986, the City Council approved a \$202,722,070 budget for Salt Lake City for fiscal year 1986-87. This budget includes \$80,728,763 in general fund expenditures. The general fund provides money for the majority of City services, with the exception of the SLC Airport Authority, water and sewer, and City golf courses. Approximately 75% of resources of the general fund are derived from taxes.

This year's budget reflects an overall decrease of 22.8% from last year's budget. It also reflects a 2.9% increase in the general fund when compared with last year's budget. This document details how we have allocated the budget among the various divisions within our City government.

This budget has been one of the most difficult to prepare in recent memory. Our dilemma has been to maintain City services while facing substantial reductions in federal aid. Notwithstanding, I feel that the City Council and Administration have worked hard to produce a budget that best meets your needs.

I hope the following explanation will help you better understand the allocation of City resources.

CHANGES IN FUNDING

Perhaps the most serious problem we faced in preparing the budget was that estimated revenue is down significantly from last year. We started with more conservative revenue projections than in the past. These projections reflect the decreases in revenue that we experienced during the past fiscal year.

A significant reason for a lower revenue estimate is that we assumed Congress would not reauthorize federal revenue sharing. Revenue sharing has long been an important revenue source for local government and has been a way for taxpayers to see some local benefits from their federal tax dollar. We estimate the revenue loss will be about \$3.6 million.

We also estimated a decrease in franchise fee revenues. The utilities no longer pay franchise fees for some areas that they formally did. As a result, our franchise fee revenues will decrease by \$1.5 million from the amount projected in last year's budget.

Without seeking additional revenue sources, we would fall significantly short of funding our base budget and yet would still face pressures from rising costs and deserving pay increases for employees.

As a result, we adopted a budget that reflects additional revenue sources: a franchise fee on water and sewer services, increases in building and housing fees, increases in parking fines and additional parking revenue due mainly to the decriminalization of the parking ticket.

This year's budget also requires a property tax increase, which will result in \$3,250,000 additional revenue. A tax increase is not a desirable alternative. However, I think that a further reduction of basic services is even less desirable.

It is interesting to consider the property tax increase in light of losing federal revenue sharing. If revenue sharing had continued, the increase in property taxes would not have been necessary. In fact, its elimination was a way for congress to raise revenues for federal programs by placing the burden of raising taxes on local government.

In total, the changes in funding means that the general fund receives about the same level of funding as budgeted for during the previous year. However, last year's budget would not be sufficient to meet this year's cost pressures and demands for additional services. As a result, we had to reexamine and reprioritize the services we provide.

IMPACTS ON SERVICES

Overall, we did a good job of maintaining basic services. However, the job was not accomplished without significant sacrifice. One such sacrifice was a cost of living increase for employees.

We also asked each department to suggest possible cuts to their base budget. These suggested cuts were analyzed by my staff and candidly discussed with each department. Many of those cuts have been incorporated into the final budget. The general fund budget includes a net reduction of 47 full-time positions. Other cuts include a significant decrease in travel, reduced funding for furniture and equipment, reduced street lighting services, restricted watering in City parks, consolidating police and civilian crime prevention programs, and delaying the replacement of needed vehicles in the City's fleet.

SUMMARY

This year's budget required some difficult decisions. However, I think it is an equitable budget. I think the combination of budget reductions, fee increases and tax increases is a fair way to distribute the sacrifice necessary to achieve fiscal stability. The fact that Salt Lake City will retain its AAA bond rating for another year is evidence of our commitment to sound fiscal management.

Formulation of this year's budget has been challenging and more challenges still await us. I am committed to implementing a strategic planning program that will help us prepare now for the challenges that lie ahead. I look forward to working with you toward maintaining the high quality of life characteristic of Salt Lake City.

Sincerely,

Palmer A. DePaulis

luce A. Delando

Mayor

NOTES AND COMMENTS

The 1986-87 Adopted Budget includes information concerning the individual departments, their divisions and funds of Salt Lake City Corporation. The following general information is included to assist the reader in understanding the information presented in this document:

Departmental Organization Charts

Organizational charts included in the budget represent the functional structure from the department head through the first divisional level. Also included are, where applicable, the sub-division or sub-program name. In order to assist the City Council and others identify a contact person within that function, the individual immediately responsible for that function is listed.

Departmental Budget Summary (Financial)

Financial budget information is presented by major expenditure category and a total expenditure budget by division is presented for additional infor-Six expenditure categories are included in the Adopted Budget: Personal Services, Operating and Maintenance Supplies, Charges and Services, Debt Service, Capital Outlay and Capital Improvements. The Personal Services category includes all salary, insurance, benefits and other payroll costs associated with both full-time and part-time employees. Operating and Maintenance Supplies include all materials and supplies (i.e. asphalt oil, cement, stationery supplies, etc.) necessary to achieve the purposes of the department. Charges and Services include all services (i.e. telephone rental, legal fees, consultant services, etc.) not provided by employees assigned to the department which are necessary to achieve the purposes of the department. Debt Service includes all categories used to retire debt. Capital Outlay includes all expenditures for capital (i.e. equipment, automobiles, etc.) not included in the Capital Improvement Program. Capital Improvements include all expenditures in the Capital Improvement Program budget.

Departmental Budget Summary (Authorized Personnel)

This budget document serves as the official manning (staffing) document for the City and provides the Council with the detailed information which they requested on the individual titles and pay classes. Therefore, personnel are presented for each department by division to include the total number of authorized positions and job classifications within each division. A grand total authorized position count is provided on the final page of the department's authorized personnel form. Summary and comparative data are found on the FTE Summary in the "Schedules" section.

Because this is the official City staffing document, any changes made to it which cause an increase in base cost, but no change in number of positions, is detailed and presented to the City Council for their review. Any requested changes in total number of positions is presented to the City Council for their approval.

Comparable Data

Data presented in the 1986-87 Adopted Budget has been adjusted to make it comparable. Data shown in the 1984-85 Actual column has been adjusted to include all audit adjustments so the column compares to the 1984-85 annual financial statements. Data shown in the 1985-86 Adjusted Budget column has been adjusted to exclude any function which has been transferred to another government agency and for which we are not budgeting in 1986-87. For departments which have shifted functions between them, prior-year data has been adjusted to compare with 1986-87 data.

Capital Improvement carryovers, encumbrances, and grant carryovers have been eliminated from the 1985-86 data to make it comparable to the 1986-87 budget. Thus, comparison between the data included in the Adopted Budget and the data included in interim and annual financial statements can only be made if carryovers are added to the Adopted Budget or eliminated from the financial statements.

Data presented in the 1985-86 Adjusted Budget column of the Departmental Budget Summary form do not include amounts appropriated to fund balance. Therefore, these totals will different from those shown on the Budgeted Resources by Fund and Budget Uses by Department schedule.

Capital Improvements

Detail project schedules are provided in this section for Capital Improvement and Special Assessment projects of general and enterprise fund departments.

Capital improvement project budgets are accounted for in a separate fund and therefore do not intertwine with operating budgets. As projects are completed any remaining budget remains in this separate accounting fund and is reallocated to other capital projects as they become necessary.

The amount budgeted by a department for capital improvement needs is shown on that department's Departmental Budget Summary (Financial) by the line item entitled "Capital Improvements Budget".

Budgeted Capital Improvement projects were selected from all of those requested and were prioritized by the Capital Planning and Programming subcommittees chosen for that purpose. Once they are selected for funding the projects receive priority of treatment from within the department staff or from outside influences, such as environmental impacts, etc.

Schedules

Schedules are presented showing revenue sources, expenditures by division within department, individual fund summaries, and a two-year comparison of authorized personnel strength.

Budget Amendments

During the course of the fiscal year, the City may find it necessary to amend the budget. If an amendment is requested which will increase the budget of a fund or will shift budgeted amounts between funds or department, a public

hearing is held ten days after a published notice is printed to allow the Council to hear comments on requested changes. The Council will then amend the budget or reject the request by majority vote of those Council members present. From time to time shifts will be made within a fund administrative—ly. These shifts do not affect the total budget of a fund.

Debt Administration

in April, 1986, citizens of Salt Lake city approved a \$34,500,000 general obligation bond issue to pay for a three-year restoration project of the City and County Building.

In June 1986, the City sold \$34,500,000 of general obligation public building bonds. Proceeds of the bonds will be used for renovation and restoration of the existing City and County Building. A portion of the proceeds will be used to pay interest on the bonds until the restoration is completed, when a property tax levy will be assessed to make principal and interest 1985, the City issued \$2,800,000 of Certificates of in Participation to fund replacement of needed Fleet vehicles of which useful life was reduced as a result of the excess demand placed on them during snow storm and flooding emergencies. The Certificates of participation are being repayed over a three-year period. In September, 1986 the first principal and second interest payment, totalling \$961,919 will be paid and in March, 1987, the third principal payment, totalling \$61,981 will be paid. These payments are an obligation of the general fund. Outstanding general obligation bonds issued for airport improvements, totaling \$18,035,000 at June 30, 1986 are to be paid from Airport revenues. Redevelopment Agency tax allocation bonds outstanding in the amount of \$8,400,000 are secured by a first pledge of taxes levied upon taxable property in the redevelopment project area, as well as all revenues of the Redevelopment Agency. The Redevelopment Agency also has \$1,950,000 of home improvement and rehabilitation bonds outstanding. bonds are a special obligation of the Redevelopment Agency, and are secured by and payable from payments on loans issued from the bond proceeds. Outstanding Water and Sewer Utility revenue bonds of \$31,749,922 at June 30, 1986, are obligations of future net revenues of both the Water Utility and Sewer Outstanding airport revenue bonds at June 30, 1986, totalled Utility. The City Irrevocably pledged the net revenues of the City \$58,998,280. airports to the payment of the bonds. In addition \$3,467,000 of special assessment bonds are outstanding.

The City's General obligations bonds continue to have a rating of "Aaa" from Moody's investors Service. The "Aaa" rating is the highest possible rating for a municipality.

Budget Control

The expenditures of appropriated budget are controlled at the appropriation, division, and major expenditure level (i.e. personal services, operating and maintenance, charges for services, capital outlay, etc.) in order to prevent over expending a particular category. An expenditure request made upon a category which is budgetarily depleted will be systematically rejected and the department will be notified of the deficiency. The department may propose a revision if funds are available within that department and may shift funds, as per City policy, with approval from the Department Head, Director of Finance, or the budget staff and correct the deficiency.

Certificate of Conformance

The Government Finance Officers Association of the United States and Canada (GFOA) presented an Award for Distinguished Budget Presentation to Salt Lake City, Utah for its annual budget for the fiscal year beginning July 1, 1985.

In order to receive this award, a governmental unit must publish a budget document that meets program criteria as a policy document, as an operations guide, as a financial plan and as a communications medium.

The award is valid for a period of one year only. We believe our current budget continues to conform to program requirements, and we are submitting it to GFOA to determine its eligibility for another award.

Program Performance Budgeting vs. Salt Lake City

Prior to fiscal year 1983-84, the City's Budget Document included written performance objectives and demand and performance indicators identifying levels of service which could be provided by a program. In fiscal year 1983-84, the Administration, with the Council's approval, changed its position on budgeting objectives and allowed the Council, with departmental input, the fiexibility of initiating objectives and policies for the various departments. The basic policy statements remain the same from year to year until the Council initiates changes. Presently, there is no staff review of the policy statement responses from the departments. Requests for increases in service levels require the departments to more completely justify their requests with performance indicators.

Presently, Salt Lake City is developing a strategic plan which will include steps to develop and examine definite performance objectives and some type of demand and performance indicators, and also a system of review to determine if maximum economics of scale are being achieved.

Revenue Highlights

Some of the basic projection factors used to calculate fiscal year 1986-87 revenues are: Property tax revenue is expected to rise 13%, of which 3% is from property re-evaluations completed by the County and 10% from normal growth and mili levy increases; Sales tax revenue is expected to rise 3% from normal growth and 3% from and 2/64th increase in the rate; Franchise tax revenue received from charges on utility bills is expected to rise 2% from electric power and be reduced 2.5% from natural gas, and 15% from telephones. A newly created franchise tax on our own water and sewer department will generate approximately \$1.1 million. Federal general revenue sharing revenue is expected to be reduced by 83%. Other revenue changes vary from increases in Administrative Service fees of 2.5% to decreases in grant revenue of 24%, to the use of one time funds of approximately \$1.6 million.

The only constant factor about revenue projections is that 72% of City revenue comes from tax sources and only property taxes, which is 40% of all taxes, can be effected by the City and even those are not totally controlled by the City. Because of this, the City is actively seeking new and innovative ways of funding the costs of City services. This is evidenced by one of the legislative intents regarding refuse collection in the City.

Significant Changes in Budgeting Policy

Two legislative measures passed by the 1985 State Legislature effected the Fiscal Year 1986-87 budget. These measures are referred to as "Truth in Taxation".

HB 328 - 100% assessment: Requires county assessors to assess property at 100% of its reasonable fair cash value (see Glossary for definition).

HB 388 and 272 - Tax increase Disclosure: Require taxing entities to provide public notice to property owners and hold public hearings when they intend to increase property tax revenues above that of the previous year (based on certified tax rate). County auditors are required to send a tax increase disclosure notice to every property owner effected by the proposed increased. Salt Lake City raised the property tax rate .0004 above the certified tax rate. (See Glossary for definition). Therefore, the City held a special public hearing on August 7, and subsequently adopted the final budget.

Major Guidelines

Major guidelines used by Departments in developing their budgets consisted of the following:

- Assume a 3% increase above base for electric rates.
- Assume a 10% decrease below base for natural gas rates.
- Assume a "O" increase/decrease from base in water/sewer rates.
- Assume a 25% decrease below base for travel/training.
- Assume a "0" increase/decrease from base in all other operating expenditures.

Additionally, each department was asked to submit 5 and 10 percent reduction scenarios of their base budget.

The budget committee reviewed the reduction scenarios and cut approximately 3,000,000 from departmental <u>base</u> budgets.

SANT' LAKE: CHIY CORPORATION

OFFICE OF THE CITY COUNCIL

211 CITY AND COUNTY BUILDING SALT LAKE CITY, UTAH 84111 535-7600

Dear Salt Lake City Resident:

On August 7, 1986, the Salt Lake City Council held the final public hearing, as required by the State's new "Truth in Taxation" law, and adopted the 1986-87 budget for the Salt Lake City Corporation. The budget maintains service levels which ensure that Salt Lake City will continue to be a pleasant and safe city in which to reside.

The budget adopted by the City Council, however, is an austere one. Many difficult decisions and choices were made during the budget process which takes months and provides many opportunities for citizen involvement. The budget provides for basically the same funding as was approved for 1985-86. Most city departments will operate with less money, and in some cases with fewer staff, while paying higher costs for many items which must be purchased by the city.

The budget represents an attempt to provide essential services to the city's residents, while absorbing increasing costs, for the same amount of money as was budgeted in previous years. This will be achieved by increased efficiency, elimination of services which are not critical, and reorganization of some programs.

Individual city departments have absorbed the majority of the budget cuts required because of reduced federal revenue. The Council has chosen this budget strategy in order to maintain our commitment to capital improvements. It is the belief of the Council that maintenance of our infrastructure through capital improvements is vital to the continued viability of the City.

In spite of the significant reduction in funding for departments, the City would not be able to maintain basic services without an increase in property tax. The expected loss of Federal Revenue Sharing and reductions in Community Development Block Grant funds has made it necessary for the Council to approve an increase in the property tax rate.

City employees have been asked to share in the sacrifices imposed by the tight budget. The budget contains no cost-of-living increase for City employees. The Council regrets that revenues are not adequate to provide salary increases to employees which keep pace with inflation. The Council is confident that the City's employees understand that the federal revenue reductions mandated significant curtailment of expenditures in order to maintain fundamental city services.

The budget represents the outcome of a difficult and sometimes unpleasant process. The budget approved by the Council maintains essential services but requires prudent financial management by all City departments.

The City Council pledges to continue its efforts to provide high quality services at the lowest possible cost to the taxpayer.

Sincerely,

Earl F. Hardwick

Chairperson

Salt Lake City Council

FY 1986-87 Legislative Intents

It is the intent of the Salt Lake City Council that the administration pursue for implementation on July 1, 1987, a mechanized trash collection program to be funded by a trash collection fee adequate to sustain the program and that the administration include in the FY 1987-88 budget a proposal to create an enterprise fund for trash collection.

It is the intent of the Salt Lake City Council that out of the amount appropriated, the parks department fund a part-time staff for the Sugar House Rose Garden in the amount of \$2,500.

It is the intent of the Salt Lake City Council that the Mayor initiate a management and efficiency audit of the Data Processing Division of the Administrative Services Department since the Council is concerned that data processing costs have increased and believes the city's costs for data processing should be studied to determine their validity.

It is the intent of the Salt Lake City Council that the weed abatement program should be reinstated since there is funding in the budget.

It is the intent of the Salt Lake City Council that within three months, three specific city positions be audited.

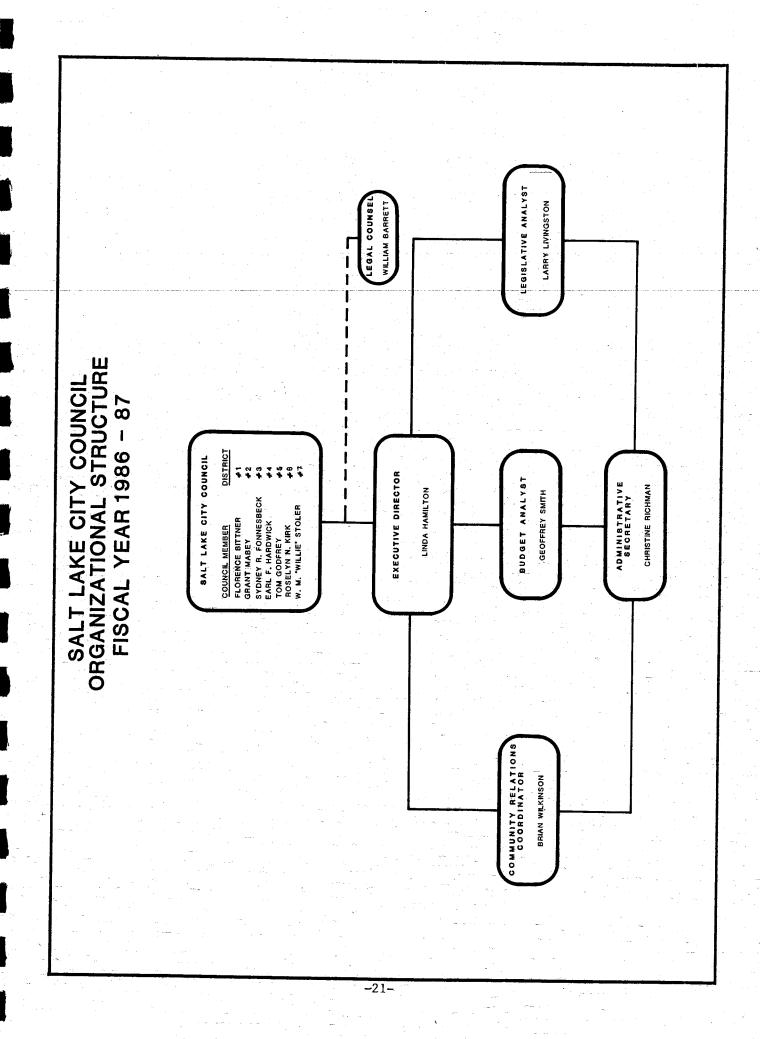

It is the intent of the Salt Lake City Council that since mid-management and professional series employees constitute a disproportional number in relation to other classifications of the city's authorized full-time equivalent positions and the Council is concerned that the number of mid-management and professional employees has increased by 9.5% since 1984 while the total number of other employees has increased by 1.87% in the same time period, the Council's intent is that the executive branch work with the legislative to institute an in-depth review of employees in these classifications with the intent of effecting a 5% reduction in the total number of employees in these classifications, which intent includes a restriction upon promotion within this classification to fill positions vacated by retirees or attrition without Council review.

It is the intent of the Salt Lake City Council that the administration work with the City Council and Council staff to revise the budget document format so the document provides more extensive information by program and by overlapping programs; the Council desires to begin work immediately so the document provided next fiscal year will better meet the needs of the Council and the administration.

It is the intent of the Salt Lake City Council that the administration identify programs that could be accomplished or supplemented by volunteers; the Council specifically requests, prior to January 31, 1987, a report on using volunteer school crossing guards.

It is the intent of the Salt Lake City Council that any Federal Revenue Sharing Funds received by the city in excess of the amount budgeted be dedicated for capital projects; the Council requests that the administration submit recommendations for which projects should be funded if these funds are received.

It is the intent of the Salt Lake City Council that funding of \$110,000 for the sports complex be placed in the C.I.P. contingency fund pending completion and review of a master plan for the complex.

#### CAPITAL IMPROVEMENT PLANNING AND PROGRAMMING

The Capital Improvement Program (CIP) was developed through a process of studying Salt Lake City's capital improvement needs and deficiencies, and analyzing the City's financial resources and capabilities for financing capital projects. An annual capital improvement budget is adopted each year by the City Council for the next fiscal year, authorizing funds for capital projects for that year only. The Capital Improvement Program provides a long-range perspective to aid decision makers by setting forth City wide needs, estimating resources available to fund those needs, and prioritizing projects which should be considered for inclusion in future capital improvement budgets.

Applications for capital improvement projects are solicited from Salt Lake City residents and City departments and submitted to the Capital Planning and Programming division (CPP) of the Department of Development Services. These applications are compiled with schedules of projects contained in existing community master plans, the 3-Year Community Development Plan and the previous year's Capital Improvements Program. All project budgets are then adjusted for inflation. Next, an estimate of future funding amounts and a preliminary project schedule is prepared by CPP staff, utilizing existing plans and citizen input. This schedule is reviewed by the Capital Improvement Program Administrative Review Committee (CIPARC) comprised of representatives from each City Department. Revisions are made based upon their input.

The Mayor reviews the list of Capital improvement projects and makes a recommendation on funding as a part of the fiscal year's recommended budget. After final review, the City Council adopts the annual Capital improvement budget and the projected program schedules and they are incorporated in the overall City Budget for the current fiscal year.

#### SPECIAL REVENUE FUNDS

Special revenue funds are used to account for the certain property taxes, grant funds, and other special revenues legally restricted for specific purposes. The City budgets for the following revenue funds:

Central Business Improvement Fund - To account for special license fees which are restricted for downtown projects or improvements.

Community Development Operating Fund - To account for monies received by the City as grantee participant in the Community Development Block Grant (CDBG) program, except for CDBG monies to be used for capital improvements which are accounted for in the Capital Projects Fund or the proprietary funds.

#### SPECIAL ASSESSMENT FUNDS

Special assessment funds are used to account for the financing of public improvements or services deemed to benefit the properties against which special assessments are levied. The City budgets for the following special assessment funds:

Curb and Gutter Fund - This fund is used to account for the financing of curb and gutter improvements. Special assessment bonds are financed by the City and by assessing property owners who benefit from the improvements.

Street Lighting Fund - This fund is used to account for the installation and operation of additional street lights, the cost of which is paid by the City and by property owners who benefit from these improvements.

Special Improvement Guaranty Fund - This fund was established for the benefit of bondholders as required by the special assessment bond resolutions and state law. This fund receives a tax levy of one mill, unless the fund balance is equal to or greater than forty percent of the amount of all outstanding special assessment bonds issued prior to March 30, 1981, plus twenty-five percent of the amount of all outstanding special assessment bonds issued on or after March 30, 1981.

#### **ENTERPRISE FUNDS**

Enterprise funds are used to account for operations that are financed and operated in a manner similar to private business enterprise where the intent is that the costs of providing goods or services to the general public on a continuing basis be financed or recovered primarily through user charges, or where it has been decided that periodic determination of revenues earned, expenses incurred, and/or net income is appropriate for capital maintenance, public policy, management control, accountability, or other purposes. The City budgets for the following:

- Water Utility Fund This fund is used to account for the activities related to providing water service to the residents of the City and certain residents of Salt Lake County.
- Sewer Utility Fund This fund is used to account for the activities related to providing sewer service to the residents of the City.
- Airport Authority Fund This fund is used to account for the activities related to the operation of City airports.
- Golf Course Fund This fund is used to account for the operation of golf course facilities for use by the general public.
- Park, Recreation and Development Fund This fund is currently used to account for proceeds from the lease of the City's wave swimming pool to a private corporation. The private corporation expanded the facility at their cost and charges admission for use by the general public.

#### INTERNAL SERVICE FUNDS

Internal service funds are used to account for the financing of services provided by one department or agency to other departments or agencies of the City. The City budgets for the following internal service funds:

- Fleet Management Fund This fund is used to account for the costs of the fleet management system which provides vehicles for use by City departments, and which provides vehicle maintenance on a cost-reimbursement basis.
- Data Processing Fund This fund is used to account for the costs of providing data processing services to City departments. Costs are recovered by charges to user departments.
- Employee Benefit Self-Insurance Fund This fund is used to account for the costs of providing insurance for employee health, accident, long-term disability, unemployment and workers' compensations.
- Central Fire Dispatch Fund This fund is used to account for the costs of providing fire dispatch services to the Salt Lake City Fire Department and to other local governmental entities.
- Governmental Immunity Fund This fund is used to account for payment of general liability claims against the City.

#### TRUST AND AGENCY FUNDS

Trust and agency funds are used to account for assets held by the City as trustee or agent for individuals, private organizations or other governmental units. The City budgets for the following trust and agency funds:

Expendable Trust Fund:

Miscellaneous Grants - This fund was established to account for individual private and intergovernmental contributions held in trust by the City for the Indigent Services, Emergency Medical Services, Historic Preservation Strategy and other funds received in subsequent years to be held for a specific purpose.

Tracy Aviary - This fund is used to account for costs associated with the buying and selling of birds at the Aviary.

#### Salt Lake City and Its Services

Salt Lake City is the capital and largest city in the State of Utah. Permanent settlement of the City began on July 24, 1847, when Brigham Young with a party of 148 Mormon pioneers entered the Salt Lake Valley after a 1,500 mile trek westward. The Salt Lake Valley soon became a major center for trade and commerce, with wagon trains carrying settlers and miners westward. Within a few years of the pioneer's arrival, other communities were settled throughout the Salt Lake Valley. Due to continuous economic and population growth, most of these cities in the valley have grown into a single large metropolis of over 690,000 people. Salt Lake City is the commercial center of this metropolis.

Salt Lake City is also the center of the scenic intermountain west. Within a day's drive of the City, one can visit 70% of the officially designated national parks and monuments of America. The Wasatch Mountains, east of the City, are well-known for their ski resorts, which are within forty-five minutes' drive from downtown Salt Lake City. Approximately 200,000 out-of-state skiers come to these resorts each year.

The University of Utah is located on the east bench of the City. This university was founded in 1850 and is the oldest mainland university west of the Missouri River. Approximately 25,000 full and part-time students are enrolled. Utah State University, Weber State College and Brigham Young University are located within a two-hour drive from the City. The City also has Catholic parochial schools, a business college, an Episcopal school, a Lutheran school, Westminster College of Salt Lake City (a fully-accredited interdenominational college) and Utah Technical College at Salt Lake.

The City is the international headquarters of the Church of Jesus Christ of Latter-day Saints or "Mormon" Church. At Temple Square in downtown Salt Lake City, 2-1/2 million visitors see the famous Salt Lake Temple, Tabernacle and Visitor Center each year.

The Salt Palace (located in downtown Salt Lake City) plays host to many different activities. This facility is composed of a 12,700 seat arena, 2,600 seat assembly hall, and numerous meeting and exhibit spaces. It is the home of the Salt Lake Golden Eagles of the International Hockey League and the Utah Jazz of the National Basketball Association.

Salt Lake City is a major transportation crossroads in the Intermountain west. Three major railroads, ten major airlines, two bus lines and many truck lines serve the area. The City is located at the convergence of four major highways and two interstate highway systems. The Salt Lake International Airport is the air transportation hub of the intermountain west and the principal center of operations for Western Airline.

The City provides a full range of municipal services including police, fire, parks, six municipal golf courses, libraries, water, sewer, airports, public improvements, highways and streets, planning and zoning, and general administrative services.

#### Notes:

- (1) This department was created during fiscal 1980 when Salt Lake City Corporation changed from a commission form of government to a council-mayor form of government.
- (2) Prior to the fiscal years 1978 and 1979, respectively, the Mayor and the Office of Budget and Management Planning were included under other departments or other funds. It is not practicable to identify expenditures for these departments prior to the years listed.
- (3) Effective July 1, 1981, the transactions of the Community Development Block Grant that were previously accounted for in the General Fund were accounted for in a special revenue fund. In addition, some reclassifications of functions were made among departments.
- (4) Effective July 1, 1982, the Office of Personnel Management was included in the department of Finance and Administrative Services.
- (5) Effective July 1, 1983 the Office of Budget and Management Planning was included in Development Services and Finance and Administrative Services.
- (6) Excludes extraordinary flood cost expenditures reflected as unbudgeted extraordinary items in the general purpose financial statements.
- (7) Effective July 1, 1985, Finance and Administrative Services became two separate departments.

1984	18.79	<b>-</b> _	3.39	40.68	19.40	.27	2.00	_	84.53
1985	17.48	<del>-</del>	3.12	38.81	19.89	.25	1.76	2.00	83.31
1986	18.79	· <b>-</b>	3.70	38.09	22.85	.25	1.97	1.80	87.45

#### Note:

Assessed valuations were increased in 1979 as a result of a revaluation of property in Salt Lake County. The revaluation was part of a state-wide revaluation to provide greater equality between similar properties located among counties. This was critical because the State's school fund equalization program depended upon equal property assessments among counties.

Notes: For purpose of this table the City's general obligation airport bonds are not considered direct general obligation debt. To this date, the airport bonds have been liquidated from airport revenues and it is expected that they will continue to be liquidated from airport revenues in the future.

The City has \$2,800,000 of certificates of participation outstanding which are not included as general obligation debt.
