All Electrical Permits have a \$57 base fee, plus the total of the above chart, and a 1% Utah State Fee.

A plan review process is required for all "new" generator & EV installations. After submitting an electrical permit application through the [Citizen Access Portal](#), submit a site plan, construction plans, and installation specs to [ProjectDox](#) for plan review.

This form represents the fee schedule only, and is not an application for a permit. To get a fee estimate for your project try using [OpenCounter](#).

To apply for a electrical permit, please use the [Citizen Access Portal](#).
