Power to Panel Application

A power to panel permit that is issued from this office to a contractor or owner is for **construction only**.

It is to allow full power to the building for testing of electrical systems such as lighting, heating, air-conditioning equipment, elevators, emergency systems, etc. **This permit does not allow occupancy of the building, home, condominium, or portions thereof.** Occupancy of a building is allowed only after all final building, electrical, plumbing, and mechanical inspections are approved and a certificate of occupancy is issued.

Violation of any model code shall result in the disconnect of electrical services from premises. This includes: building, electrical, mechanical, plumbing, sprinklers, fire, energy or of any zoning ordinance. This also includes engineering items, such as street, curb, and gutter requirements that are not corrected or resolved.
