Dear Mayor Biskupski and Council Members,

I appreciate the great partnership that we are building between Utah's newest city and Utah's capital city. As neighbors, I believe strongly that this relationship can be a powerful force and mutually beneficial. Last week, our City Council unanimously approved two resolutions that I have been asked to share with you.

The first is a resolution encouraging study of the potential of the S-Line Streetcar extending south into Millcreek. Hopefully, you agree that this is an intriguing possibility and worth further study. If so, we encourage you to pass a similar resolution expressing your shared desire to investigate this exciting potential with us!

The second resolution concerns several boundary adjustments. We've had numerous discussions with your staff about these objectives and have passed a resolution to show our united desire as a Mayor and Council. We have a number of property owners who would like to disconnect from Salt Lake City and annex into Millcreek, but we feel that a boundary adjustment would be a better solution for all. We have a specific offer regarding the Brickyard area that we would like you to consider.

Again, I wish to express our appreciation for your service and look forward to our continued partnership.

All the best,

Jeff Silvestrini, Mayor
