

2 MINUTE TIME LIMIT

- **Past Habit:** Idling for more than **10 seconds** uses more fuel and emits more pollution than restarting your vehicle.¹
- **Present Circumstance:** Vehicle idling creates **1.6%** of all greenhouse gasses in the U.S. That's almost double the total emissions for the iron and steel manufacturing industry.²
- **Future solution:** With your help in vehicle idling reduction, Salt Lake City can eliminate **365,966 lbs. of air pollutants** in 2015.³

By being a part of our
Idle Free City, you:

- **Save money** by reducing fuel use and prolonging engine life.
- **Breathe easier** by preventing noxious exhaust from building up in and around your vehicle and the valley.
- **Respect the environment** by cutting out emissions that contribute to smog.

One idling vehicle isn't the main culprit of air pollution—thousands of them are. **Small changes and individual actions make a difference for everybody.**

If you are able to talk to the owner of an idling vehicle, please ask them to turn off their vehicle until they're ready to drive.

If you would like to report an idling vehicle in real time, please call (801) 535-6628.
