FIRE STATION

3

Operable Windows and sliding doors provide natural ventilation and a connection to the outdoors.

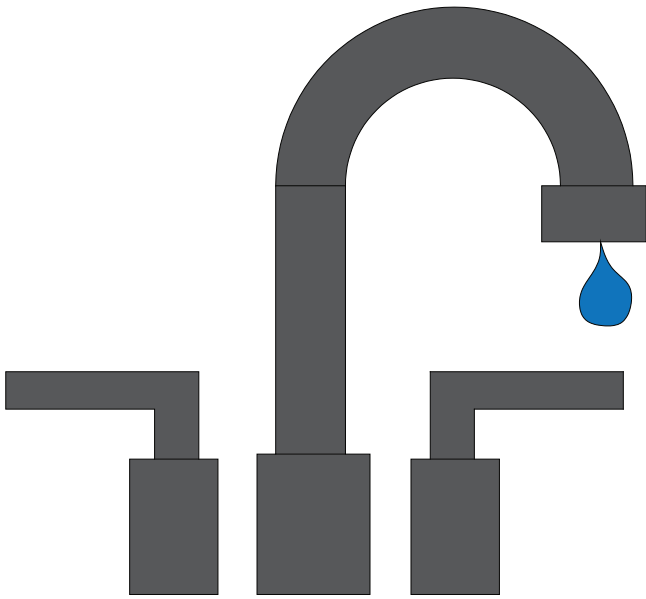

Windows and doors are tied to position switches that turn off mechanical heating and cooling units to save energy

SLC

FIRE STATION

3

Low-flow plumbing fixtures have been integrated throughout the Fire Station. In conjunction with water efficient landscaping, **over a 120,000 gallons of water are projected to be saved over the course of a year** as compared to the water use of typical fixtures and landscaping.
