I could use the smallest container	can			
	Downsize			
How do I figure out the size of my can?	confusion			
Size doesn't isn't an incentive for me to reduce waste; rather I collect waste and than order the can that will accommodate it best.				
I'm very grateful for the variety of sizes as I usually put one of each can out per month. Sometimes I put out the green garbage can	Size doesn't	General positive		
twice monthly.	incentivize	comment		
	Charge more for			
Wish there was a discount for the weeks you didn't put bins out on the curb because you didn't have garbage. We only put ou	r garbage			
bins out once every two-ish weeks and lâ€ [™] m not big on paying for all the weeks when we didnâ€ [™] t even use them because of our	produced/single	Every-other-week		
efforts to reduce waste.	individual	or share cans		
I got the large size can years ago and was unaware there were small cans appropriate to our garbage stream. We'll downsize the can,				
but our garbage stream won't be lessened.	incentivize	Will downsize		
	Charge more for			
	garbage			
I would actually charge even more for the 60 and 90 gal containers. The 60 gal can is 1.5 times the 40 gal can so charge 1.5 times the	produced/single			
40 gal rate, same for the 90 gal can.	individual			
everyone should get a 90 gallon can for the low price. you save money by not having to buy all three sizes of cans. plus you save by				
not having to transport cans of different sizes just because some one doesn't want a big can. why would you care whether its half				
empty or not. plus when the customer needs more space they have to dump their garbadge in some one elses can or keep it till the	Size doesn't		Likes big garbage	
		One can size		
next week. We already have huge rat problem in slc. Now if you want to help there I would pay more.	incentivize	One can size	can	
	Recycling			
Most renters in our neighborhood are too lazy to recycle. Maybe if landlords charged extra not to recycle	important	Questions recycling		
Here's why I say no. I have little waste but like how the 90 gallon fits in the space I have for cans. Mine is rarely even 25% full. Also I have a neighbor with a small can. They put their trash in mine or other neighbors cans every week when it's on the street. I pay for a larger can yet they (without ever asking me) piggy pack on my expense.	Misc			
cans are expensive	Too expensive			
I use the cans i was given.	Misc

replacements now and then.	comment	Service complaint	
I would prefer to be charged by pickup frequency. Even with a small garbage container, I only put it out about once a month. It would be nice to incentivize waste reduction by providing savings for using the bin less.	Charge more for garbage produced/single individual		
Large households generate more garbage than small households. Should families be penalized by how large their family is? NO! Waste management charges should be divided equally among all property owners. Every property should be issued one standard container. It costs the city the same dollar amount to have a driver and truck come pick up a small vs. large container. If people can't			
move the larger container, they should be given the option of having a smaller one, but they pay the same.	incentivize	One can size	
We downsized because we produce little garbage and wanted a new can. The city brought us a gross used one. This was disappointing.	Likes small garbage can	Service complaint	
	Likes small garbage

I'm Good with the small one I have and I think it great incentive to charge more for larger cans.	can	incentivize	
Could there be a smaller container with smaller fee for those who produce less garbage?	Charge more for garbage produced/single individual	Smaller garbage can	
There must be an alternative such as a pay per use for any size containers. An automated system with a reader on the truck and container surely could be invited. Or, check with other cities around the globe to find out how the manage household waste payments other than just charging a blanket higher fee for households. In fact, charge each apartment unit, condo unit and not just the building and businesses throughout the City easily could see an increase before households.	Charge more for garbage produced/single individual		
the building and businesses throughout the City easily could see an increase before households.			
Wish I could pay less as a once a month user of the smallest can :)	Likes small garbage can	Too expensive	
They are all too big for a 2-4 person household. Offer even smaller sizes for those of us that consistently recycle and backyard	Smaller garbage		
compost (and therefore generate very little waste).	can	Bins too big	
The city should recycle more, so we don't have to send too much waste to the landfill	Recycle more items General positive		
price is fair	comment		

Some weeks we fill up the big container and sometimes we can go 2-3 weeks between putting it out for pickup. I don't feel incentived			
to move to a smaller bin because there are times that it won't do.	incentivize

Having an option is useful	General positive		
Having an option is useful It should be cheaper			

I use a 40-gallon can at my house. I have less garbage due to having just myself in my household. Of course, families would need a					
larger can. I don't believe that the size of the can, therefore the price, gets people to generate less garbage. "Garbage" is generated					
by items that aren't recyclable or are tainted by food. Since a lot of garbage is due to what a person's choices are offered in					
supermarkets, I'd prefer to see the City focus on decreasing the supply chain of items that aren't recyclable. Other cities have done					
this, and I believe it is doable. It's my belief that the city keeps wrenching money out of it's citizens. I already hear that the taxes on		Size doesn't	Likes small garbage	More education on	
homes will probably go up next year by 8% or more. What's that money to be used for, if not services? Always more money.	Too expensive	incentivize	can	recycling

As I understand, the default container size is the largest - to properly incentivize wast reduction, the city should start with the smallest	:			
and the effort should be on the consumer to change to a larger size. Also as cost structuring is set-up, the city is incentivized to have				
consumers use the largest containers and it's a bit of a zero sum game. Perhaps a better incentive for the resident would be a flat fee				
for city services (waste, green waste, recycling) and the 40 gal container is "no charge". The larger containers have additional fees.		Charge more for		
Also, I think the larger containers should have a stronger proportionate fee increase to discourage the larger containers. However, I		garbage

it might be nice to be able to swap sizes at different times of the year, maybe this is an option i don't know about	individual			
i think the goal to live waste-free or low-waste is one to work towards, but is also an extremely privileged one. consider a family of 5,				
who have limited access to resources (money, time, etc.) and to education. it's simple to reduce your family's waste if you can				
afford to buy in bulk, which will drastically reduce your single-item waste. or to buy rechargeable batteries to avoid throwing away				
nonreusable ones. or buying a diva cup instead of menstrual pads each month. but those options COST MORE MONEY UPFRONT. in				
the long run, you're definitely reducing waste and saving money but it's not always easy for a family to have access to the				
extra start-up costs. in the woke-financial world, it's often said that being poor is expensive. if you produce more waste as a result				
of lack of resources, i think it is unfair to be punished by higher waste disposal costs and unwise to incentivize waste reduction this				
way. maybe this could be decided based on rent vs. own, utility subsidization, literal zipcode, if the family's kids are i'm				
free/reduced lunch, etc. honestly, i think a lot of affluent people aren't incentivized to produce less waste because a bucket costs				
more, the extra charge each month is negligible, but those with less money definitely get punished the most. (fyi this is coming from	Fee structure

		-	Recycling		
switched to the smallest can. My household has more recyclables than garbage.	can Conorol nositivo	comment	important		
	General positive				
I sincerely hope you maintain choice of container size for garbage.	comment				
While I like the idea of the variable size can, and we very rarely produce more than about 30 gallons of trash in a week, the fear of					
running out of space in the can and having to delay the disposal of waste is much greater than the incentive of saving a few dollars	Size doesn't				
per month. I do not believe having a large can has an impact on our efforts to recycle and compost as much as possible.	incentivize				
As one person, even the smallest can is too big for majority of the weeks of the year. But there are cases I fill the whole can and wish I					
had a bigger one.	Bins too big				
There should be a plan or way too make it easier for people to try out different sizes. I have the 90Gal, but probably don't need it but					
I know that sometimes I might, so I don't want to go through a lot of hassle to change to the 60 only to find out that that is too small.					
Although, I guess that doesn't change my waste use, it's just that I'm paying more than I probably need to, which probably doesn't	Size doesn't				
impact you.	incentivize				
	General positive				
really appreciate that you offer the different sizes.	comment				
reary appreciate that you oner the different sizes.	comment				

N/A	-			
I think this is fair on two levels - the first being that if a household has more waste (whether due to habits or simply family size) they should pay more because they are using up more space in our landfills. Incentivizing waste reduction actually comes second in the reasons why I think this is fair.	General positive comment	Charge more for garbage produced/single individual	Waste reduction	
The problem with allowing each household to choose the container size is, you never know if you're ever going to have weeks where	Size doesn't			
you have a lot more trash than normal.	incentivize			
		Size doesn't		
Why have different sizes? Waste of money	Too expensive	incentivize		
Some neighbors use our bigger cans without permission rather than order a bigger can for their needs. Not always good for us.	Misc	Cheat system
