

# Uinta Brewing

"We've been humming along on 100% renewable energy since 2001, starting with wind and then adding solar to the mix. But we haven't stopped there: from capturing and recycling steam from one brewing cycle to heat the next batch, donating spent grain to a local rancher, and utilizing a centrifuge that filters the beer without chemicals, we're always looking for ways to make better beer in a way that is better for the planet."

—UINTA BREWING

## RECENT MILESTONES

**10%**

reduction in energy consumption from boiler

**90%**

reduction in suspended solids discharged to City treatment plant

**100%**

of facility powered by renewable energy

## FUTURE SUSTAINABILITY GOALS

Reaching a 100% diversion rate for all organic waste with aid of Wasatch Resource Recovery

Expand their Ride-In, Ride-Out, which incentivizes employees to ride their bikes to work for a chance to win a \$1,000 at a local bike shop

Expand participation of alternative transportation incentive (employees earn a case of beer for every 250 miles traveled using mass transit, carpool, or active transportation)
