

XMission

“XMission believes in protecting and preserving Utah’s beauty, and we take a number of steps to minimize the impact that our business practices have on the natural world. We properly dispose of all electronic equipment through partnerships with local recyclers, continually improve the energy efficiency of our operation, and are powered entirely by renewable energy through purchasing Renewable Energy Credits (RECs). Through these efforts, XMission is taking a leadership role as a sustainable business and we actively encourage our business and residential users to engage in responsible practices themselves.”

ONGOING EFFORTS

100% renewably-sourced energy

Full sponsorship of transit passes for employees

Recycles all electronics and metal waste

ACCOMPLISHMENTS

ENERGY STAR Score of 100

HVAC improvements leading to 35% reduction in energy use

Innovative *Aisle Containment* system for optimal data center cooling

2017 Skyline Challenge Award Winner
