Streets which have been determined by an engineering study to have hazards beyond the end of a roadway shall have an End of Roadway Closure barrier installed or a minimum of three red 18” X 18” diamond shaped reflectorized panels should be used.

The Barricade must extend to the pavement edge if there is a roll curb or no curb.

The Barricade must not be further than 4 feet from the fence of a vertical curb.

### Paint and Stripe 2” x 10” wood barricade as follows:

1. Paint all exposed surfaces, one white prime coat and one coat of white reflectorized paint.
2. Red Striping to be one coat of reflectorized paint.
