Also in attendance were Nathan Zaugg, Corollo Engineering; Donald Champenois, AECOM; Trevor Lindley, Brown and Caldwell; Keith Larson, Bowen and Collins; and Mike Wilson, Metropolitan Water District.

Welcome and Introductions

Ted Boyer and Laura Briefer welcomed the attendees.

Approve Minutes of March 23, 2017 Meeting

Committee member Ted Wilson moved and Committee member Roger Player seconded the motion to approve the minutes of the February 23, 2017 meeting, as submitted. All members present voted aye. Committee member Lynn Hemingway moved and Committee member Ted Wilson seconded the motion to approve the minutes of the March 23, 2017 meeting, as submitted. All members present voted aye.

Water Reclamation Facility – Award and Recognition

Laura introduced Matt Meyers from the Water Environment Association of Utah. He ~~had an award to present~~ ed to Dale Christensen the Hatfield Award for Professionalism.

Financial Report – Mark Christensen

Mark Christensen presented the Department's financial report. ~~Regarding t~~ The budget process, update is that there will be three public hearings with the city council and the schedule has not been finalized yet. There will be ~~some~~ more media coverage on the rate increases and there has not been much feedback from the public yet.

Mark then presented Aan overview of the financial results, focusing on revenue, operating expense, debt service, capital expenditure and financial position.

Lynn Hemingway asked what is driving the rate increases. Laura explained that the increases are attributed to improvements for the waste-water facility and other capital projects, along with aging infrastructure. Lynn asked if the prison was related to the increases. Laura explained that the prison is paying for the utilities that will need to be built for the area of the new facility.

Water Supply and Spring Runoff Outlook – Jesse Stewart

Jesse Stewart ~~made~~gave a PowerPoint presentation and explained what the Salt Lake City water delivery area and water sources are. Jesse spoke about some of the national websites that area available for ~~watching-predicting~~predictions-of annual precipitation, temperature fluctuations, and water supply forecasts. Using this information, the ~~d~~Department makes decisions on holding back flows of water from the reservoirs in order to mitigate possible flooding during runoff season. The stormwater crews are out in the field to ensure that the infrastructure doesn't get blocked with sediments and debris.

The current stream flow is average to above average. The reservoir storage is very good. The groundwater supplies are good, and ~~we-the~~ Department manages ~~our-its~~ water resources with an eye to future drought potential.
