

RED BUTTE CULVERT AT SUNNYSIDE

FALL 2015

Red Butte Culvert at Sunnyside Ave - Rehabilitation

BACKGROUND AND NEED

The existing culvert under Sunnyside Avenue is failing. The purpose of the project is to repair the flowline, or bottom of the culvert, and to repair the remainder of the culvert in a separate phase. The culvert consists of three different structure types grouted together to span the width of the road. Due to the complex nature, traditional methods cannot be used.

CONSTRUCTION IMPACTS

A majority of the work will take place within the culvert. Short-term road closures or detours may be required. Before construction activities begin, notification will be sent to each residence in the areas adjacent to the work. The information in the notice will include the timing of construction, anticipated road closures, and any other impacts of the project.

ROAD CLOSURES AND DETOURS

Prior to working in any open traffic area, the contractor will submit a traffic plan to the Salt Lake City Engineer for approval. This will minimize impacts to public and private property access.

Residents are asked to avoid parking vehicles within the road right-of-way while construction is occurring on their street. This will protect personal property, minimize impact to neighborhoods, and expedite work. In most cases, the contractor will be required to complete major construction and road restoration during a 45-day period to limit the impact on any one street.

SAFETY

Safety is a top priority for SLC Public Utilities. We encourage and appreciate neighborhood participation to keep children away from the construction equipment and work areas. **Parents, please talk with your children about staying away from potentially dangerous construction and staging areas.** If you see any vandalism or trespassing in construction areas, please call the **Salt Lake City Police Dispatch: 801-799-4600** to report the incident.

FREQUENTLY ASKED QUESTIONS

Q: How will I be notified about construction beginning on my street or property?

A: 14-days prior to beginning work on any street, the contractor is required to hand deliver a written Construction Status Update Notice to all residents, businesses, schools, and property owners adjacent to and affected by the work.

Q: Who do I call for a water/sewer/flooding emergency?

A: For water, sewer, and flooding emergencies, please calls our Public Utilities Dispatch at 801-483-6900. This line is staffed 24 hours a day.
