Ben,

Just a note to give suggestions to fix the mess the Marshes have caused,

We do not want any townhomes built in our community. This is a family friendly community with numerous townhomes and a large apartment complex surrounding us,

So, I am suggesting the Marshes excavate five or six basements for single family dwellings, then have five or six premanufactured homes attached to each of the foundations. They could rough in basement and build a covered carport for the home.

This would fit into the push to build single family dwellings with a 1500 square foot recommendation we are hearing about.

Also, I would want financials showing the Marshes have the funding of at least \$2,000,000 to fix the sewer main and water mains on Van Buren.

Just vote NO to townhomes.

Respectfully,

Lynne Robison
