### COUNCIL STAFF REPORT

CITY COUNCIL of SALT LAKE CITY

**TO:** City Council Members

FROM: Sam Owen, Policy Analyst

**DATE:** May 7, 2024

**RE:** FISCAL YEAR 2024-25 BUDGET, Department of Airports

<u>Item Schedule:</u> Briefing: May 7, 2024

Public Hearing: May 21 & June 6,

2024

Potential Action: tentative June 11,

2024

### **ISSUE AT-A-GLANCE**

Salt Lake City Corporation operates the Department of Airports as an enterprise fund. Airline passenger and other concessions-related revenues fund department operations. The airport also receives funding through federal grant programs like the Airport Improvement Program (AIP) via the federal government's Federal Aviation Administration (FAA). In this way, the airport does not rely on city tax dollars for its expenses, like operations and capital.

New terminal space coming online would result in higher revenue for this year; construction and borrowing costs related to terminal space account for higher expenses, including new operating cost. Passenger count at the Airport is projected to increase to 29 million for the year, up from 27.3 million last year. The Airport plans to bring five new gates online, as well as substantially complete and open the central tunnel for travel between concourses. See item #1 under heading B, page 5 of this report.

	Operating	Operating	Capital	Interest	To reserves
	revenue	expense	expenses	expense on	
				borrowing	
FY 25 requested	\$471,440,600	\$218,806,300	\$167,478,000	\$167,043,000	\$78,874,100*
FY 24 actuals forecast	\$340,773,400	\$184,855,800	\$57,977,800	\$142,900,000	\$80,574,600
FY 24 budget	\$339,023,100	\$195,627,900	\$188,100,800	\$121,528,000	\$185,799,700*

FY 25	39.06%	11.85%	-10.96%	37.45%	-57.55%
VARIANCE					
from FY 24					
	Operating	Operating	Capital	Interest	To reserves
	revenue	expense	expenses	expense on	
				borrowing	

<sup>\*</sup>Budget amounts to reserves depend on completion of construction elements, and subsequent grant reimbursement. So, the amount that actually goes to reserves from a given year is likely to vary from the adopted budget figure, within the timeframe of one fiscal year.

### **KEY ELEMENTS**

### Borrowing and debt

- The department most recently borrowed \$600 million in July 2023, and plans to borrow another \$600 million in July 2025. Without these two \$600 million figures, the Airport's total debt load resulting from its decade-long capital expansion is totaled about \$3.1 billion. In addition to the total debt, the Airport also intends to use a tool called an "interim credit facility" that would provide project capital before the next planned issuance 2025. The interim credit facility would be in front of the Council for feedback and decision later this year, probably during July and August 2024. This mechanism can provide cash between larger bond issuances. The credit facility would be paid off right away from the 2025 issuance. See item #2 under heading B, page 6 of this report.
- Debt largely goes to fund construction of the New SLC, the Airport's redevelopment and campus expansion program. See item #3 under heading B, page 6 of this report.

### Airline incentive disbursement

• The airport incentivizes airlines to route passengers through the Salt Lake City International Airport and does this in part by applying a credit of \$1.40 per passenger flown through the airport. This is an increase from previous years' \$1 per passenger flown through the Airport. Of the proposed increase, the Airport writes: "The strategy behind increasing the incentive was to give all carriers a financial incentive that would cause them to grow market share and have more passengers in Salt Lake City and get an immediate benefit, in addition to help offset the increased costs with the new Airline Use Agreement that is effective July 1, 2024." The total budgeted disbursement back to airlines is \$20,187,800 for FY25, up from budgeted \$13,047,400 last year.

### Costs per enplaned passenger

• Costs per enplaned passenger are projected to increase to \$17.88 each from last year's budgeted \$9.94. Pandemic-era public support that had contributed to keeping this cost low has now expired. Furthermore, additional terminal space and new airline agreements result in higher costs for airlines. Aviation revenue to the Airport per enplaned passenger is budgeted at \$20.56.

### Employee additions and costs

• The proposal includes requested funding for 25 additional airport FTEs, as well as 6 new police officers, a 5% cost of living adjustment (COLA) and 6.5% for insurance, contributing to the proposed increase in salaries and benefits of \$8,265,400 ongoing, as listed here.

### Capital improvement program highlights

- Notably, the FY25 capital improvement program proposal includes a \$ 107,045,400 request for design and construction of a new cross field taxiway system. New construction of taxiways U and V would improve aircraft circulation and runway safety. Snow removal operations would also benefit. The appropriation includes planning, design and construction. An estimated completion date is October 2028. Airport Improvement Program funds would cover more of the cost than regular Airport funds, by about three to one. Last year's appropriation to this project was \$83,376,000.
- Other funding requests for capital projects include general aviation hangar renovation and relocation, \$4,483,000, as well as electric vehicle charging stations for passenger vehicles and busses, \$2,711,000, and parking lot bus lane improvements, \$3,067,000.

### Previous year parking lot appropriation

- A previous year capital appropriation for relocation of the Surplus Canal is an early step toward planned construction of a new employee parking lot. The canal spans part of the old golf course land. Last year's appropriation to the parking project was \$62,367,000; approximately \$1.8 million has been expended so far. Council Members had raised concerns about adding hardscape over existing permeable open space.
- Prior to Surplus Canal relocation, the Airport plans to start construction on a south phase of the employee parking lot, comprised of 3,000 parking stalls, to be constructed in 2025. The next phase, in conjunction with the canal relocation, would provide another 4,000 parking stalls, and could be complete in 2027.

### Parking area fee increase

• Daily maximums on some parking are proposed to increase by \$5; in one lot from \$21 to \$26, and for the on-site garage, from \$35 to a planned \$40. The Airport adds, "The planned increase is \$40 on July 1st [2024], and if behavior isn't changed and there are continued capacity constraints, then the Airport may charge as high as \$45."

### Estimated grant income

• The coming year budget anticipates \$97,515,600 in federal grants for ongoing capital improvements and other expenses.

### **POLICY QUESTIONS**

- 1. Passenger mobility within and between Airport facilities has been a major point of public feedback in recent years. Would the Council like to ask staff to collect information on policy and budget measures that could be implemented to ensure movement through the Airport is optimal, especially for passengers who experience higher barriers to seamless mobility in public and commercial spaces?
- 2. Would the Council like to request options for getting to augmented bus service on 5600 West, via the City's interlocal with UTA?

- a. The Airport provided this as one possible change that could meaningfully enhance transit access to the Airport at times of day and night when it would be most impactful, especially for employees.
- 3. Would Council Members like more discussion about expansion of on-demand UTA transit service in the western part of the City and valley?
  - a. This would explore a change to include the Airport, and could open the service to more employees, reducing parking burden on-site. Increasing this service is one option the Airport thought of to advance goals of transit use. This service involves a rideshare-like interface where UTA coordinates individual transportation from one location to another.
- 4. Would the Council like more discussion about greater coordination with UTA to produce a more user-friendly transit experience at the Airport? For example, a welcome center, transit kiosk or staffing resources could be deployed to encourage passenger transit use from the Airport.
- 5. The Airport suggested the Council might consider advocating for or funding rideshare discount codes, to provide another transit modality for people going to and from the Airport. Would the Council like to review this option?
- 6. Would the Council like more information about environmental improvements the Airport could programmatically advance or incentivize among its General Aviation tenants and users? For example, programs or incentives targeting reduction of using fuel types that generate more exhaust than advanced counterparts.
- 7. Would the Council like to request information on policy and budget measures could be deployed to cap development of surface parking on the Airport campus?
- 8. The Council might request more regular updates on any Airport initiatives that involve regulatory autonomy, where decisions are made by Airport staff, and then presented to the Council in a consolidated budget proposal.
  - a. For example, are there opportunities for feedback and oversight on the order or sequence of capital improvements proposed, year over year?
  - b. Could certain elements of the capital program be prioritized to meet Council goals?
  - c. Does the Airport implement programming on-site, such as marketing, that the Council could review and provide input on before initiatives move ahead?
- 9. Would the Council like to review programming and policy decisions the Airport makes that impact interlocal partners, such as the Mosquito Abatement District, or area law enforcement? Policy decisions made regarding partners like these, & their operations at the Airport, can result in general fund and tax-base impacts germane to the Council oversight role in the city and its organization, overall.

### ADDITIONAL AND BACKGROUND INFORMATION

The following question and answer is from staff-level correspondence about the Airport budget proposal for fiscal year 2025.

### A. Could you discuss any changes to Airport passenger transit patterns anticipated based on new TRAX and other public transit service?

According to Utah Transit Authority's (UTA) most recent Long-Range Transit Plan (LRTP) there are several new and modified transit options planned which may have either a direct or indirect impact on passenger transit patterns when implemented over the next ten years. We have worked closely with UTA and the Salt Lake City Transportation Division to ensure that both passenger and employee data is provided to assist in these projects. Passenger enplanements are forecasted to increase 8% year over year, increasing from 13,413,110 in 2023 to 18,938,214 in 2027, an increase of over 5.5 million passengers. To meet this passenger demand, airlines and new concessionaires will add employees, potentially resulting in some additional 5,000 employees to the over 17,000 current employees. Reliability, frequency and expanded coverage are all key dynamics to ensuring transit utilization by airport passengers. Although some of the projects listed below will not be implemented for several years, during our regular meetings with UTA and the City Transportation Division, we have focused on the following projects, as they may have direct impact to both passengers and employees:

- 2025-2026: 5600 West Enhanced Bus Service: 15-minute bus service from downtown Salt Lake City to 9000 South
  - Benefits: Will add bus service to the airport, which is currently only served by TRAX, providing more flexibility to passengers and employees. As currently planned the bus service will mimic TRAX operating hours, therefore the airport is requesting expanded service hours, for the Downtown to West Valley section.
- **2024-2027: 236 West Valley Airport Bus Route**: 15-minute bus service from West Valley Central Station to the Airport
  - Benefits: This bus route will be a direct link from the West Valley area, its population and employee base, to the airport with expanded hours.
- **2042-2050: 710 TRAX Orange Line**: Reconfigured TRAX Line— Salt Lake City Airport to University of Utah
  - O Benefits: While this project is still in initial development, the expansion of the Orange Line to the University of Utah/ Research Park will assist in increasing the passenger load on public transit from the University of Utah (student section) of the service area.

### B. Additional information from Airport staff on budget topics

1. The New SLC project continues to advance and meet scheduling and budget milestones. The Airport is excited that the central tunnel will be open to all passengers connecting to Concourse B on October 22, 2024. Structural steel has started on the final phase of the project that will add 16 additional gates and will be completed in October 2026.

- 2. The Airport plans to issue an interim credit facility up to \$300 million dollars to take advantage of higher than expected interest rates in the long term borrowing markets. This will allow the Airport to delay issuing General Airport Revenue Bonds by 12 months at a much lower interest rate and then pay off the interim credit facilities with the planned \$600 million dollar issuance in the summer of 2025. The bond issuance in 2025 is the last new money deal required to complete the \$5.13 billion dollar New SLC project.
- 3. The Airport's Capital Improvement Program is guided by the master plan that identifies projects that will be required within the 5, 10, 15, and 20 year outlook along with the financial feasibility of paying for those projects. Currently everything outside of the New SLC is being cash funded with airport cash reserves although projects on the longer time frame may utilize debt financing. The New SLC was included in the previous master plan and elements of it are included in the recently completed master plan.

### AIRPORT FY24-25 BUDGET PROPOSAL

### FY 2025 Budget Goals & Objectives - Budget Drivers

- Forecast revenues and expenses on information known today with reasonable assumptions for the future
- Assumptions and actual results will be reviewed in a timely manner and appropriate actions taken
- Control costs and look for ways to continue to strengthen non aeronautical revenue growth
- Fund major capital improvement projects with funding provided under the Bi-Partisan Infrastructure Law (BIL) Grants
- Secure interim credit facility to bridge gap for long term funding expected in FY26 to continue to finance the New SLC

### **Overview of Changes**

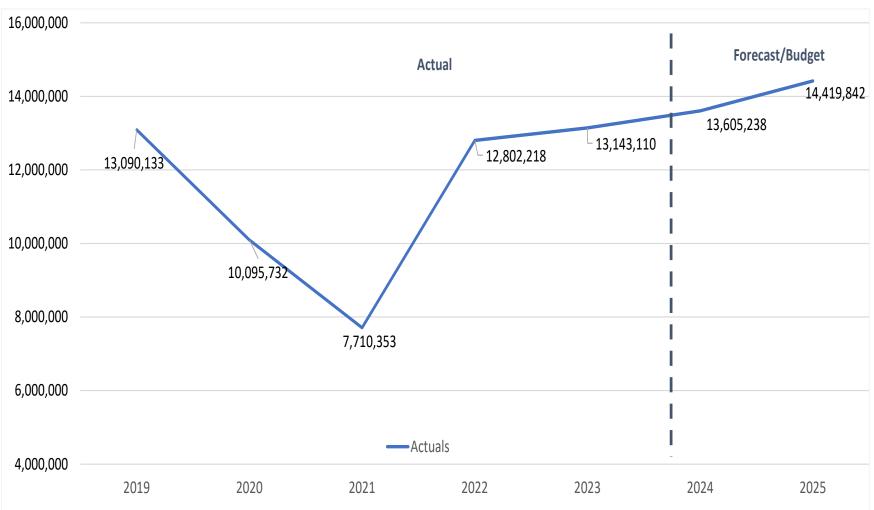

Description	FY 2024 Budget	FY 2024 Forecast	FY 2025 Budget	
Operating Revenue	\$339,023,100	\$ 340,773,400	\$471,440,600	
Passenger Incentive Rebate	(13,047,400)	(13,078,500)	(20,187,800)

AIRPORT FY24-25 BUDGET PROPOSAL

### **Comparison of Operating Expenses**

Expense Category	FY 2024 Budget	FY 2024 Forecast	FY 2025 Budget
Salaries and Benefits	\$71,089,300	\$68,255,300	\$76,520,700
Maintenance Contracts	34,012,200	29,801,600	38,182,700
Services	33,420,300	29,343,000	34,657,500
Materials and Supplies	18,939,600	17,725,800	25,014,000
Intergovernmental Charges	23,501,800	24,312,800	27,974,700
Utilities	7,566,200	8,105,600	8,347,400
Other	7,098,500	7,311,700	8,109,300
TOTAL OPERATING EXPENSES	\$195,627,900	\$184,855,800	\$218,806,300

### Labor and Operating Expense Highlights

- 25 New Airport Employees \$3.2 Million
- Police \$2.8 million includes 6 new officers
- \$2.3 million for 5% COLA and 6.5% Insurance for all Airport Employees
- \$3.1 million for Janitorial increased scope and supplies
- \$1.8 million for one-time costs to upgrade and purchase radios
- \$1.6 million for VXS recorders installed in 2020 that have a five year life cycle
- \$1.6 million in Chemicals and Salt
- \$1 million in other fuel for SVRA (West Jordan) and TVY (Tooele) Airports
- \$920k increase to City Data Processing Services

### AIRPORT FY24-25 BUDGET PROPOSAL

### CITY COUNCIL TRANSMITTAL

jill love (Apr 9, 2024 12:39 MDT)

Date Received: 04/09/2024

Jill Love, Chief Administrative Officer

Date Sent to Council: 04/09/2024

TO:

Salt Lake City Council

Victoria Petro, Chair

DATE: April 9, 2024

FROM:

Bill Wyatt, Executive Director, Department of Airports

SUBJECT:

Airport FY24-25 Proposed Budget

STAFF CONTACTS: Brian Butler, Airport Chief Financial Officer, Department of Airports

**DOCUMENT TYPE:** Budget Briefing

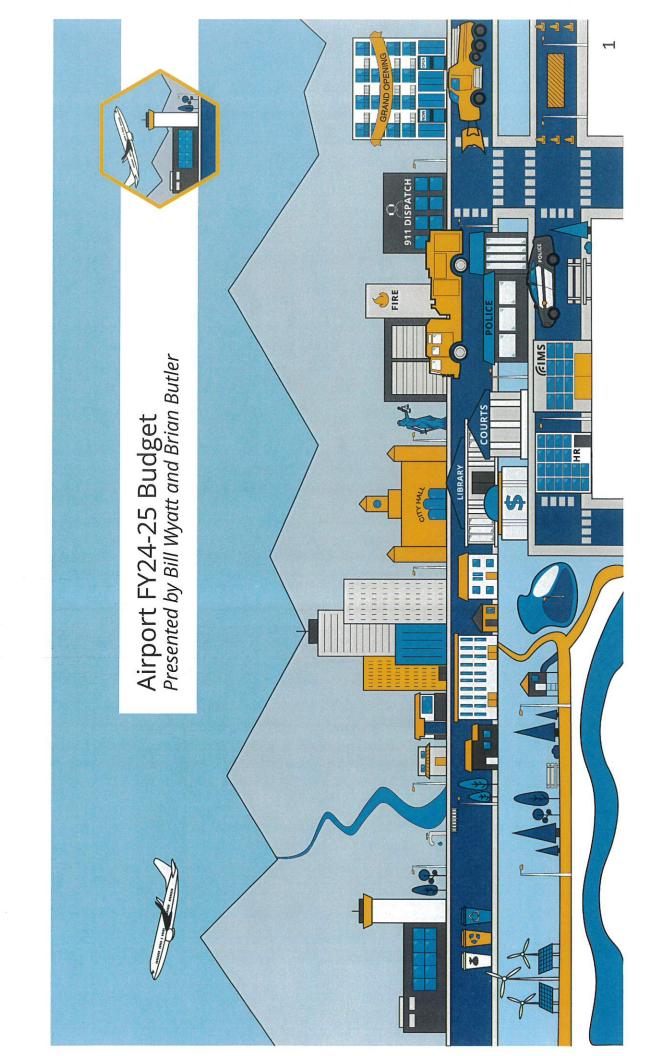

**RECOMMENDATION:** The Administration recommends that, subsequent to a public hearing, the City Council adopt the proposed budget for the Department as part of the FY2024-25 adopted budget.

BUDGET IMPACT: This proposed budget will have no impact on the City's General Fund budget. No General Fund revenues or expenditures will be required to finance the budget for the Department because 100% of the capital and operating expenditures will be paid from the various types of revenues generated at Salt Lake City International Airport ("Airport"), South Valley Regional Airport, and Tooele Valley Airport (collectively, the "Airport System"). Such revenues include the landing fees, terminal rentals, and other fees paid by the airlines serving the Airport, as well as various revenues generated from sources other than the airlines. Non-airline revenues are derived from sources such as parking, rental cars, food and beverage concessions, news and gift concessions, cargo revenues and various types of rental income.

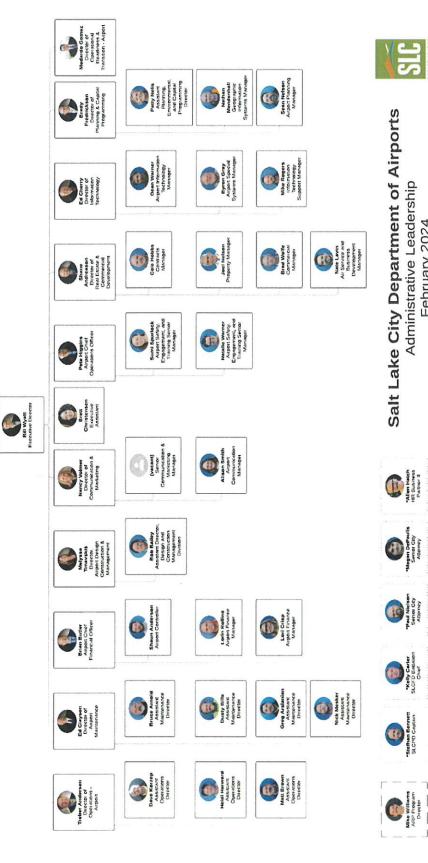

**BACKGROUND/DISCUSSION:** See Budget Presentation, attached as Exhibit A, and Budget Book, attached as Exhibit B.

for

**FISCAL YEAR 2025** 

### Fiscal Year 2025 Budget Message

### April 2, 2024

The Department of Airports is an enterprise fund of Salt Lake City Corporation and does not receive any general fund revenues to support the operation of the City's system of airports. The Department of Airports (the Airport) has 664 employee budgeted positions and is responsible for managing, developing, and promoting airports that provide quality transportation facilities and services, and a convenient travel experience.

The Fiscal Year 2025 budget continues to see growth in enplanements, revenues, as well as expenditures. The budget no longer contains Covid-19 relief grants that were used to recover lost revenue as well as subsidize the rates and charges for commercial and cargo carriers. The Salt Lake City International Airport (SLCIA) continues to benefit from the Bipartisan Infrastructure Law (BIL) grants awarded for FY2025. The BIL grants will continue to provide much needed and critical funding for airport capital infrastructure projects that are moving from design into actual construction. The Airport will be bringing on five gates located on Concourse B as well as the opening of the much anticipated central tunnel in October 2024. These openings bring additional staffing and maintenance staff requirements while seeing the complete elimination of the remaining hardstand operations.

The developed FY25 budget continues to provide positive financial benefits with increased passengers and revenues that help offset increased operating expenses. The Airport will continue to fund important capital projects. These projects include the Phase III and Phase IV of construction of gates on Concourse B. In addition, critical projects found in the airfield, landside, and auxiliary airports will continue to be funded to ensure that all Airport's owned facilities keep up with critical infrastructure to support the growth we are currently experiencing as well as the growth we are projecting into future years.

### Air Service

Served by thirteen airlines, SLCIA provides 321 average daily departures and arrivals to 92 non-stop destinations. The Airport's extensive route network served over 26.4 million passengers in FY23, a new all-time high for SLCIA. Enplaned passengers are estimated to increase by approximately 2.9% from the FY24 budget of 14.1 million enplanements to 14.5 million enplanements for FY25.

### **Economy's Budgetary Impact**

The airline industry is working through engine and aircraft shortages to meet the demand of travel. Airlines have responded to increased demand in passenger traffic by increasing flight frequencies and upgauging aircraft size to accommodate more passengers and keep load factors high. An effective partnership between the airlines and the Airport requires a continued focus on operating costs, while maintaining service and safety. During the FY25 budget process, the areas of focus were providing resources to continue implementation of The New SLC, providing staffing for key positions in the new facilities, and aligning the Airport's resources, including people, money, and time.

To address the economic environment, the goal in FY25 was to recognize increased staffing requirements as well as additional debt service coming online that is causing an increase in terminal rents. The FY25 budget will see significant increases to operating and maintenance expenses due to a new Airline and Use Agreement starting on July 1, 2025, and the Airport no longer having Covid-19 relief grants that were issued by the FAA. The Airport continues to hire employees required for the new facilities as well as address labor wage issues for both airport and contract employees. Many of the increases in operating expenses are directly related to higher wages, but also include increases in operating supplies & vendor contracts to operate the new facilities. Airline revenue requirements have increased due to the increase in operating expenses as well as higher debt service in the current fiscal year. Operating revenues are increasing by 39.1%, and operating expenses increasing by 11.8% over the FY24 budget.

### **Major Capital Projects**

Guided by the approved Airport Master Plan and the Plan of Execution, an executive management tool, the Airport, with its consultants and the airline representatives, is continuing the design and construction of The New SLC.

The Terminal Redevelopment Program budget of \$2.86 billion has been budgeted and encumbered in prior fiscal years. Phase II of the program was completed in October 2023 that saw an additional 22 gates being opened on Concourse A east.

The NCP budget of \$2.27 billion has been budgeted and encumbered in prior fiscal years. During FY24, construction activities continued building out the central tunnel, concourse B central node and concourse B east. Phase III which includes the central tunnel and 5 gates on concourse B east will open in October of 2024 with Phase IV being programmed to deliver gates in October of 2025 and 2026.

The FY25 budget includes \$134.5 million for airfield projects with \$107 million for a multi-year project to construct taxiways U & V. Remaining projects include the reconstruction of taxiway F (F1 – F2), taxiway H1 & End Runway 16L / 34R, taxiway G (E to north of the Delta ramp), decommissioning runway 14/32, utilities infrastructure for north cargo expansion and an environmental assessment for the runway 16L / 34R extension program. These airfield improvement projects ensure the safe operation of aircraft and preserve valuable assets, while planning for future development.

The FY25 budget includes \$6.9 million for landside projects that include additional electric charging stations, reconstruction of the Economy Lot bus lane, replacement of equipment at the QTA facility, and funds for the landside pavement management program.

The FY25 budget also includes \$5.2 million for the demolition of various hangars on the east side of SLCIA and roadway and site improvements. These projects will aid in the development of corporate hangars on the east side of SLCIA.

Funding for the Airport capital improvement program includes reserves generated by the Airport, airport improvement program (AIP) grants from the FAA, passenger facility charges (PFC), customer facility charges (CFC) and general airport revenue bonds (GARBS). The Airport will go to the bonding market for additional funding for the TRP and NCP to provide additional funding for Phase 4 of the project.

### **General Aviation**

The General Aviation Advisory group continues to provide ongoing review and feedback for the Airport as general aviation facilities are developed. In FY24, \$1.7 million has been budgeted for taxilane and infrastructure, pavement preservation, and apron expansion at South Valley Regional Airport (SVRA).

### Airline Agreement

The FY25 budget was prepared based on the airline use agreement dated July 1, 2024. This is a ten-year agreement, with a termination date of June 30, 2034. Delta, Southwest, and Alaska have signed an

extension through June 30, 2044. Rates and charges consist of a residual rate-setting method for the airfield cost center and compensatory method for the terminals. The Airport is forecasting a \$20.1 million revenue share with the airlines which is based on enplaned passenger numbers from the airlines. This will be credited to the air carriers on a monthly basis.

### **Financial Summary**

The FY25 operating revenues will increase by \$132.4 million over the FY24 budget to \$471.4 million. This increase is primarily due to increased terminal rents of \$85.8 million related to the new airline use agreement, portions of Concourse B and the central tunnel coming online, and additional debt service allocated to those facilities. In addition, enplanements are generating an additional \$15 million dollars in non-airline revenue through parking, rental cars, food and beverage, and retail.

Operating expenses will increase by \$23.1 million over the FY24 budget to \$218.8 million. Employee related increases include salary and health care increases. Operating expenses include an increased expense for professional services, consisting of janitorial, window cleaning, baggage handling, and networking contracts, as well as other contracts and CPI increases.

### Conclusion

The Department of Airport's FY25 budget aligns the department's mission of managing, developing, and promoting airports that provide quality transportation facilities and services, and a convenient travel experience. These facilities and services promote economic development by providing business and leisure travelers with access to domestic and international destinations.

Project Title:	FedEx Utilities and Roadway
----------------	-----------------------------

#### **Project Description:**

This project is for an access roadway and infrastructure improvements to allow for expansion of the north cargo apron for FedEx. Work includes design and construction of a 1,200-ft roadway including new underground utilities to future cargo facility improvements.

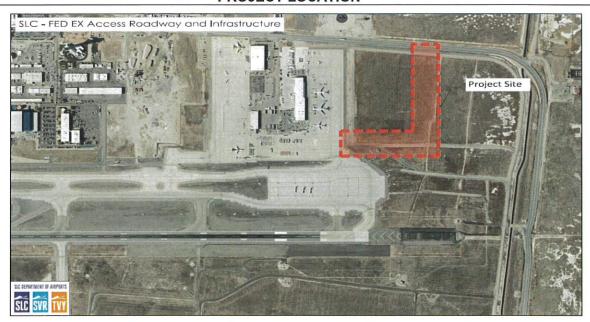

#### **Project Justification:**

In order for the FedEx cargo facility to expand in the north support area of the Airport campus, existing infrastructure and access needs to be developed to accommodate growth in expected air cargo traffic. This project will develop a site that will allow SLCDA to increase its air cargo handling capacity.

Design Start Date	Construction Start Date	Project Completion Date
July 2024	November 2024	June 2025

Construction Cost	Design, Construction Admin., & Inspection	Testing	Expenses	Contingency	Estimated Cost at Completion
\$3,087,000	\$475,000	\$62,000	\$2,000	\$309,000	\$3,935,000

AIP Funds	PFC Funds	CFC Funds	GARBS	Airport Funds
	u=.	-		\$3,935,000

Project Title: Decommission R/W 14-32 & T/W Improvements

#### **Project Description:**

This project will remove the asphalt pavement along Runway 14-32 south of Taxiway P and modify the existing taxiway connections at Taxiways J, M, P, and Q. Work includes removal of existing electrical, communication, and stormwater infrastructure. Soil preparation and seeding will also be completed for areas impacted by pavement removal and utility work. Electrical work includes removal of the existing runway visual NAVAIDs and modifications to the existing taxiway lighting and associated infrastructure. Work also includes updates to the Airfield Lighting Control and Monitoring System (ALCMS).

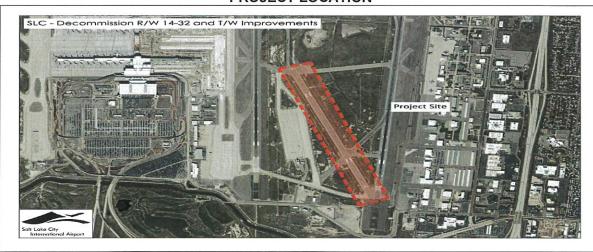

#### **Project Justification:**

This project will remove Runway 14-32 from the runway system as recommended by the SLCIA Master Plan to prevent runway incursions and address numerous non-standard geometry challenges. Project design is currently underway and options to repurpose existing pavement are being evaluated by the FAA and SLCDA stakeholders. FAA CATEX required prior to construction/demolition.

Design Start Date	Construction Start Date	<b>Project Completion Date</b>

Project Title: Taxiway U & V Proper Design

#### **Project Description:**

This project is the second of two phases that includes constructing two new parallel Taxiways U and V to connect the west and center runway. The new taxiways will tie into a new structure constructed with Phase 1 of this project that will allow the taxiways to cross over 4000 West. Work includes site preparation, earthwork and excavation, concrete paving, new airfield lighting, drainage systems, utilities, and striping.

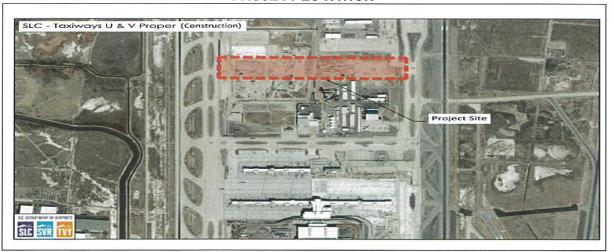

#### **Project Justification:**

The recently completed SLCIA master plan identified Taxiways U and V as a new cross field taxiway system between the north cargo support area and existing concourses. Currently Taxiways E and F are the only taxiway connections between Runways 16R/34L - 16L/34R and the terminal area. The construction of Taxiways U and V will provide alternative taxi routes to improve aircraft circulation and overall airfield efficiency and safety, particularly during snow removal operations on Taxiways E and F. This project will provide an immediate benefit to flow of aircraft on the airfield as well as improving safety by reducing traffic in a very congested area on the airfield. With passenger numbers growing and the airlines expecting to increase operations at SLCIA, there is a need to expand the airfield capacity. Additionally, the new taxiway system will allow for future maintenance to occur on Taxiways E and F as well as provide an enabling project for a future Concourse C.

**Project Title:** 

Taxiway G from E to North of Delta Ramp

#### **Project Description:**

This project is a continuing phase to maintain the Airport's infrastructure. The project is a continuation of rehabilitating the centerline panels on Taxiway G. The work will consist of replacing panels on Taxiway G between the Airport Redevelopment Program (ARP) pavement on the north side of Taxiway E to the last phase of work just north of the Delta ramp. Work will include demolition of existing concrete pavement and econocrete base, unclassified excavation of soft areas, placement of engineered fill, placement of new econocrete base course and portland cement concrete. Also included is pavement marking and reinstalling in-pavement centerline lights complete with new underground cabling and connectors.

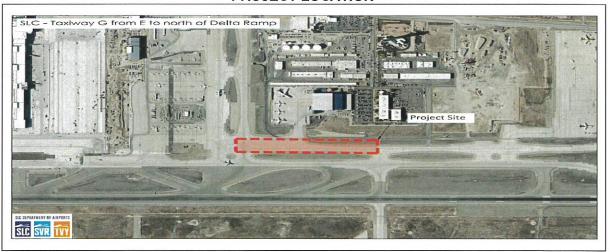

#### **Project Justification:**

Taxiway G connects the north cargo area with the terminal area. It has a high volume of aircraft use and serves as a major taxi route for cargo aircraft as well as other aircraft during deicing operations. The taxiway concrete panels are showing signs of pavement distress including spalling, full depth slab cracking, and mild to moderate map cracking. This area has longitudinal cracks that have been filled along the panels, however the cracks are continuing to widen, becoming an ongoing maintenance concern. This project will make a significant contribution to safety and capacity by ensuring that the taxiway pavements integrity is preserved to minimize potential FOD.

Design Start Date	Construction Start Date	Project Completion Date	
July 2024	April 2025	October 2025	

Construction Cost	Design, Construction Admin., & Inspection	Testing	Expenses	Contingency	Estimated Cost at Completion

\$3,000,000		-		\$1,000,000

**Project Title:** 

Taxiway H1 & End Runway 16L / 34R Repair

#### **Project Description:**

This project is a continuing phase to maintain the Airport's infrastructure. The project will consist of rehabilitating and/or replacing spalled concrete panels on Taxiway H1 and the concrete panels at the ends of Runway 16L-34R. Work will include diamond grinding, spall repair, and joint repair. This project may include select demolition and replacement of existing concrete panels including econocrete base course and new portland cement concrete placement.

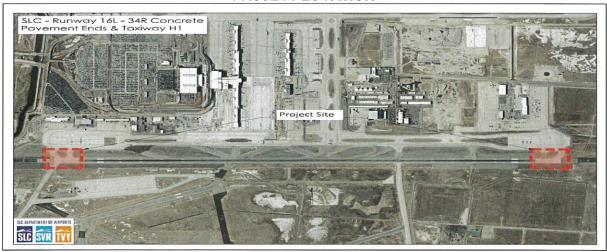

#### **Project Justification:**

Runway 16L-34R is a critical component of our airfield. It serves as one of three runways for arriving and departing aircraft. The runway concrete panels and joints are showing signs of distress including surface spalling, full cracking, and corner breaking. This project will make a significant contribution to safety and capacity by ensuring that the runway pavement integrity is preserved while minimizing FOD.

\$3,000,000	,5	-	. <del>=</del> a	\$1,939,000

Project Title: Taxiway F Reconstruction (F1 - F2)

#### **Project Description:**

This project is the 4th phase to reconstruct the east half of Taxiways E and F and bring the geometry to current FAA standards. This project will consist of replacing the pavement on Taxiway F between Taxiways F1 and F2. Work will include demolition of existing concrete pavement and econocrete base, unclassified excavation, placement of engineered fill, placement of new econocrete base course and new portland cement concrete. Also included is pavement marking and reinstallation of in-pavement centerline and taxiway edge lights complete with new underground cabling and connectors.

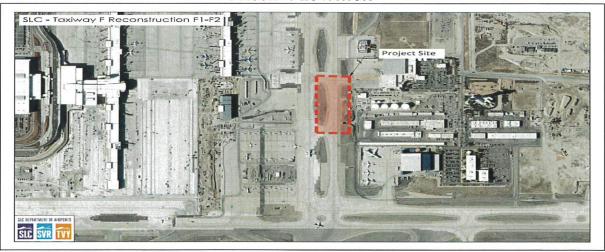

#### **Project Justification:**

Taxiway F connects Runway 16R-34L and Runway 16L-34R with the terminal area. It has a high volume of aircraft use because it serves as a major taxi route for arriving and departing aircraft. The taxiway concrete panels are showing signs of pavement distress including surface spalling, full depth slab cracking, and corner breaking. The Pavement Condition Index (PCI) for this section of pavement has a rating ranging from 57 - 66 indicating that the pavement is in fair condition. This area has received multiple patches where the concrete has settled indicating probable base failure. This project will make a significant contribution to safety and capacity by ensuring that the taxiway pavement integrity is preserved and FOD is minimized.

Project Title: Runway 16L / 34R & Taxiway Complex Ext Environment Assessment

#### **Project Description:**

An Environmental Assessment (EA) is required as part of the National Environmental Policy Act (NEPA) process for Runway 16L-34R Extension program. The runway extension program (the proposed action) includes several enabling projects to construct a runway extension to increase the length of Runway 16L-34R to the north from 12,000 feet to a final length of 14,500 feet. Enabling projects potentially include the power line relocation, taxiway extensions to the new runway threshold, and the realignment of 2100 North. The EA will state the purpose and need of the proposed action, identify reasonable alternatives, and assess potential environmental impacts of the project.

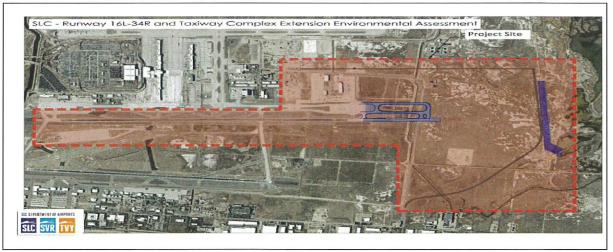

#### **Project Justification:**

The EA is required by NEPA and represents the first phase of Runway 16L-34R Extension program which includes several enabling projects. The runway extension project will allow long-haul international commercial operations, as well as provide operational take-off efficiencies to all carriers operating at SLCIA by allowing reduced thrust departures.

Project Title: SVRA Randon Aviation Taxilane & Infrastructure

#### **Project Description:**

This project will construct a new taxilane and Infrastructure for a future Randon Aviation Hangar. The work will include the excavation and removal of existing materials, storm drain installation, import of engineered fill, installation of hangar utilities to the lease line of the facility, and construction of a new taxilane.

#### **Project Justification:**

Randon Aviation is wanting to expand their operations to the South Valley Regional Airport (SVRA). They are currently negotiating their lease and want to break ground on this facility next year. This project will build a taxilane and infrastructure at SVRA that will accommodate the proposed future location of the Randon hangar site.

Design Start Date	Construction Start Date	Project Completion Date	
July 2024	October 2024	October 2025

AIP Funds	PFC Funds	CFC Funds	GARBS	Airport Funds
2=	-	-	-	\$760,000

**Project Title:** 

**SVRA Pavement Preservation & Apron Expansion** 

#### **Project Description:**

This project consist of an asphalt mill and overlay on the north section of apron at the South Valley Regional Airport (SVRA). Work will include removing existing tie down anchors, removing existing asphalt surface by cold milling, placing a new 3-inch thick asphalt surface course, and installing new tie down anchors in their original locations.

#### **Project Justification:**

The apron at South Valley Regional Airport (SVRA) has areas of cracking, rutting, and loose aggregate, creating a foreign object debris (FOD) concern. The surface has also become oxidized and brittle over time. The 2019 Pavement Condition Index (PCI) for this apron has a PCI value ranging from 56 - 69, indicating that the pavement is in fair to poor condition. Over the next 5 years, the apron pavement will further deteriorate to the point of requiring a full replacement. To extend the useful life of the pavement and to reduce FOD, the pavement surface will require rehabilitation.

**Project Title:** 

**Bus Plaza EV Stations** 

#### **Project Description:**

The project for the electrical charging infrastructure involves the design, construction, and management of an electrical charging station to support the Airport's fleet of Electric Shuttle Vehicles (ESV). The infrastructure will include four (4) Level 3 charging stations located at the Airport's bus plaza.

#### **Project Justification:**

AIP funding has secured a portion of the project funding through supplemental awards which significantly reduces the financial burden on the Airport. However, the Airport needs to fund the remaining portion of the project. This project promotes energy efficiency, leading to long-term cost savings in terms of fuel expenses. It also contributes to a reduced carbon footprint, which decreases greenhouse gas emissions, helping the Airport achieve its NetZero carbon goals and improve air quality around the Airport.

Project Title: Economy Lot Bus Lane Reconstruction

#### **Project Description:**

This project will remove approximately 12,000 square yards of failed asphalt pavement along the bus lane in the Economy Parking Lot and construct a new 10" thick Portland Cement Concrete (PCC) heavy-duty pavement section. Work also includes concrete panel replacement and repair, asphalt milling and overlay, and pavement markings.

#### **Project Justification:**

Uninterrupted shuttle service in the Economy Parking Lot is critical for transporting passengers to the Terminal. Portions of the existing bus lane are showing signs of pavement distress including rutting and fatigue cracking indicating the pavement is at the end of its useful service life.

Design Start Date	Construction Start Date	Project Completion Date	
July 2024	October 2024	October 2025

	N.	-		\$3,067,000

Project Title: Landside Pavement Management FY25

#### **Project Description:**

This project is part of the ongoing Pavement Management Program to maintain the Airport's pavement network at an acceptable level of service while minimizing the cost of maintenance and rehabilitation. The project will consist of surface preparation, asphalt milling and overlay, and surface treatment. The primary areas to receive surface treatment are the exit plaza, portions of the economy parking lot, park and wait lot, and the economy lot perimeter road.

#### **Project Justification:**

Various roads and parking lots throughout the Airport campus are showing signs of distress and require corrective action to avoid further aging and deterioration. Maintaining and preserving a pavement in "good" condition versus rehabilitating a pavement in "fair to poor" condition is four to five times less expensive and increases pavement useful life.

Project Title: QTA Equipment Replacement

#### **Project Description:**

This project will replace certain equipment along with other facility upgrades that include the following: 1. Repairing and upgrading the existing bay area lighting. 2. Replacing the existing split mechanical systems. 3. Replacing the existing car wash pressure washers. 4. Replacing the existing radiant tube heaters located in the car wash bays. 5. Upgrading the existing vacuum room exhaust systems.

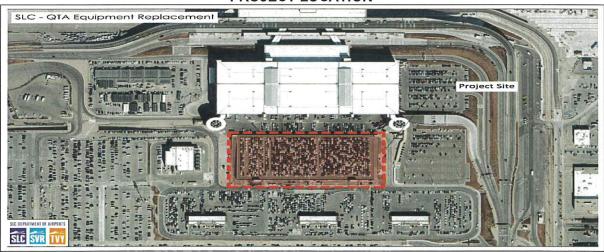

#### **Project Justification:**

Rainwater has leaked through the upper parking deck at some locations in the QTA causing damage to several existing lower-level light fixtures that need to be replaced and sealed to eliminate further damage. Increased lighting at the fuel and vacuum stations is required for work to be efficiently completed at these locations. The split HVAC system units are starting to fail, requiring increased levels of maintenance. The current pressure car wash system located within the car wash bays requires excessive maintenance due to the continual spray of water from the car wash. An alternate system to replace the inside pressure wash system with an exterior water cannon would help reduce the maintenance from water damage, eliminate the need for car wash prep stations, reduce costs of chemical usage, and be more efficient with the reuse of reclaimed water. Additionally, the existing radiant tube heaters within the car wash areas are reaching the end of their life within the next few years and will need to be replaced. The vacuum room exhaust systems are under designed and not adequate to maintain a normal room temperature level for the vacuum motors to operate properly, resulting in considerable additional maintenance problems.

Project Title: Electrical Vehicle Charging Stations - Phase IV (FY25)

#### **Project Description:**

SLCDA has created a Master Plan for a phased installation program for Electric Vehicle Charging Stations (EVCS) and infrastructure relative to the annual purchase of electric vehicles in Utah. For the past several years, the Airport has received rebates from Rocky Mountain Power and grants from the Utah Clean Air Partnership (UCAIR) which have reimbursed 50% of the cost to purchase and install EVCS on the Airport campus. This year the Airport will apply for funding incentives to install eighteen (18) Level II EVCS in two locations at the Airport. Three (3) EVCS will be installed in Lot 3 and fifteen (15) EVCS in the Economy Parking Lot.

#### **Project Justification:**

Salt Lake City is designated as a Serious Nonattainment Area for EPA's 24-hour standard for particulate matter PM2.5. Fine particulate matter, or PM2.5 is an air pollutant resulting from motor vehicle emissions that contribute to respiratory problems. The project will promote additional options for sustainable transportation and will reduce area emissions that contribute to fine particulate matter. The Airport is proposing to install infrastructure and purchase and install eighteen (18) Level II EVCS at two separate locations at the Airport.

Project Title: GA Hangar Demo - Hughes & Upper Limit

#### **Project Description:**

This project is for site development within General Aviation Zone 3 on the eastside of Salt Lake City International Airport (SLCIA) to support future corporate hangar expansion. Work will include the demolition of the existing GA-35 and GA-36 hangars, the removal and capping of all utilities, and site restoration and preparation to accommodate future development. Hughes will be building a new hangar in Zone 3 immediately east and south of the FAA FMP building with anticipated construction starting late 2023. Upper Limit has plans to relocate to South Valley Regional Airport (SVRA) in the coming year. Both of their current leases are month to month to facilitate the subsequent demolition and move to the new locations. The parcel that exists after the demolition will be redeveloped by AirMed for a new U of U facility allowing demolition of their existing facility upon completion of their new hangar and building.

#### **Project Justification:**

The only remaining undeveloped area in General Aviation Zone 3 on the eastside of SLCIA cannot currently accommodate larger ADG II aircraft for future hangar facility development. This project will demolish existing structures and complete the site work to allow for the construction of infrastructure for future growth.

**Project Title:** 

GA Hangar Demo - Rows 6, 7, &15 and Pavement Preservation

#### **Project Description:**

This project is for site development within General Aviation Zone 1 on the east side of Salt Lake City International Airport (SLCIA) to support future expansion. Work will include demolition of T-hangars (Rows 6, 7 and 15) along with asbestos mitigation, if necessary, and disconnecting existing utilities.

#### **Project Justification:**

This project will further our GA strategy by reducing the number of based general aviation aircraft at SLC, and provide our FBO operators with available sites that are developmental ready for corporate aircraft/large box hangars that will contribute to the Airport's revenue. Rows 6 and 7 are two of the oldest rows the airport has and are almost half vacant due to the aging condition of the hangars, doors, and paneling. This project will demolish facilities that are way past their useful lives and enable the Airport to systematically continue to redevelop the east side for additional corporate general aviation activities and less single engine T-hangar activities.

Project Title:

State of Utah - Sky Harbour Roadway & Site Improvements

#### **Project Description:**

This project is for site development to allow for corporate hangar expansion for the State of Utah's aeronautical activities including the Utah Highway Patrol (UHP), Civil Air Patrol, and corporate hangar development. Work includes design and construction of a 2,000-ft roadway including new underground utilities to future hangar lease lines and a new taxiway connection.

#### **Project Justification:**

North and west of the Boeing Facility is a tract of land that has been undevelopable for 38 years as Boeing has a right of first refusal (ROFR) to develop it. Airport Properties has negotated a take back of approximately 20 acres immediately west of the Boeing facility. This will accommodate much needed aeronautical development with airfield connectivity. This work is necessary to enable aeronautical developments on property that is unencumbered by agreements and will result in additional revenue to the SLCDA. The project enables the SLCDA to house the State of Utah in one area which will enable the Airport to demolish and redevelop existing State properties.
