- Increase County funding options for Behavioral Health treatment

## FREQUENTLY ASKED QUESTIONS

#### What is the City's long-term plan to reduce homelessness?

The Salt Lake Valley Coalition to End Homelessness and the State Homelessness Council have the responsibility of planning for state, local services, and homelessness needs. Both have 3-5 year strategic plans that Salt Lake City supports, focused on increasing housing, supportive treatment services, and increasing emergency shelter options in Salt Lake County.

#### Why are there camp abatements?

Salt Lake City does not want to criminalize homelessness and does not want to allow unsanctioned camps to become public health concerns. We are working with state partners to increase indoor and outdoor shelter options for people. However, large camps pose health risks due to hygiene, trash, and criminal activities. In partnership with the Salt Lake County Health Department, we do need to clean open spaces regularly to avoid these issues. We have increased our outreach efforts to move people into shelter and housing as they become available before abatements occur.

#### What about sanctioned encampments?

Sanctioned camps can look very different depending on the model being used. We have been studying these options for a while and are working with our state partners to implement them locally. The State Office of Homeless Services secured \$1,000,000 in the 2023 legislative session to implement a safe open space project they are pursuing this year with the City's support. Additionally, Salt Lake City has allocated \$500,000 toward the same concept this year. We are coordinating with our state and community partners to open a space now.

#### Who should I call if I see someone in need of help?

In an emergency, always call 911. For emergency shelter options, call 801-990-9999 between 9:00 a.m. – 5:00 p.m. on weekdays to see if there are beds available at the Homeless Resource Centers. For non-emergency issues related to homelessness, please report at myslc.gov
