

Fairmont Park

Lighting and Recreation Improvements

May 2019

Project Details

Address: 1030 East Sugarmont Drive

CIP Funding Amount: \$615,000

Phase: Construction

Anticipated Start Date:

- Construction: 3rd & 4th Quarter 2019

Project Benefits

- Sports lighting will increase playability of popular amenities into the evening.
- Adding new multiuse paths will create new opportunities for running and walking in the park. Looped pathways will encourage positive uses and discourage negative activities.
- New naming and wayfinding signage creates a welcoming public space.

Project Scope

This project will add pedestrian scaled lighting to two major pathways through the Park and add lighting to popular recreation features in the southern end of the Park. New lights for the volleyball and pickle ball courts will extend playability into the evening and through the seasons, providing more service to the neighborhood.

Proposed Improvements Include:

- New McClelland Trail connections
- Improved looped pathway and new lighting
- Tournament volleyball courts and new lighting
- New lighting for Pickle ball
- Event power
- New Park signage and wayfinding
- *The soccer fields on the west of the Park, however, will not receive lights due to proximity to residential neighborhoods.*
